Alphabetical Product Listing

Product Name	Description	Part Number(s)	Page Number
2-pin Connector	Connectors are standard in many of the controller kits, available separately as a replacement part.	20914	24
3-pin Connector		20915	24
5-pin Connector		20916	24
Aux Valve Driver	Use with KE2 Evap-RE2 Contactor Panel to control the EEV of an additional evaporator.	21612	20
Aux Relay Board	Use with KE2 Evap OEM, KE2 Comp. Seq. OEM, and KE2 Condenser Control.	21323	22
Battery – 9V	9V Rechargeable Battery for KE2 Combo Display.	21781	21
Buzzer/Light	Use with KE2 KE2 Evap Efficiency & KE2 Panels.	120VAC – 20973; 230VAC – 21294	24
Current Sensor Board	Monitors the current draw of fans and defrost heaters when used with the KE2 Evap-RE2.	21613	20
Door Switch	Use with KE2 Low Temp, KE2 Evaporator Efficiency, KE2 Adaptive Control, KE2 Evap-RE2, KE2 Evap OEM & KE2 Combo Display.	20543	24
Electronic Expansion Valves – RSV / EEV Retrofit Kits	Unipolar, stepper motor actuated electric expansion valve, designed for refrigeration applications.	Multiple part numbers. See page 27	27
Ethernet Adaptor Kit	Use with KE2 Evap Efficiency & KE2 Panels.	20938	11
Ethernet Cable	CAT5e Shielded Ethernet Cable with Connectors	50 ft. – 20185 100 ft. – 20167	11
Fan Motor Relays	Protects controller's onboard relays from transient voltages, back EMF, and motor burnouts.	Multiple part numbers.	24
Flag Quick Disconnect	Insulated, 16-14 AWG – 50 pack	20640	24
Fuses – ½ Amp	250V, 0.5A Time Delay Glass; Replacement fuses for the KE2 Evap, KE2 Evap-RE and KE2 Controlled Environment – 5 pack	20699	25
Fuses – 1 Amp	250V, 1.0A Time Delay Ceramic; Replacement fuses for KE2 Evap-OEM, KE2 Compressor Sequencer OEM, KE2 Condenser Fan, KE2 Combo Display, KE2 Humidity Control, and Aux Relay Board – 5 pack	21375	25
Fuses – 3 Amp	250V, 3.0A Fast Acting Ceramic; fuses for the solenoid wiring on the KE2 Terminal Board – 5 pack	21029	25
Fuses – 5 Amp	250V, 5.0A Time Delay Glass, fuses for the relays on the Aux Relay Board – 5 pack	21628	25
Fuses – 12 Amp	250V, 12A Time Delay Ceramic; fuses for the fan wiring on KE2 Terminal Board – 5 pack	21031	25
Fuses – 20 Amp	250V, 20A Fast Acting Ceramic; fuses for the heater wiring on the KE2 Terminal Board – 5 pack	21030	25
Fuse Cap Replacement	Gray fuse cap for KE2 Evap, KE2 Evap-RE, and KE2 Controlled Environment – 2 pack	21406	—
KE2 Adaptive Control	Controller for low & medium temp refrigeration applications with energy saving adaptive defrost and fan management. For new or existing equipment.	21177	17
KE2 Basic Display	Basic Display with Cable – 3 digit LED – for KE2 Evap OEM, KE2 Condenser Fan Control and KE2 Compressor Sequencer OEM.	With 18 in. cable – 21232 With 5ft. cable – 21387	23
KE2 Basic Display Cable	Replacement Cable for the KE2 Basic Display – 5 ft.	21878	23
KE2 Combo Display	Provides functions of a temperature display, lighting control, panic alarm, temperature alarm, and door heater controller. Stand-alone, or pair KE2 Evap OEM controller(s).	Multiple part numbers. See page 21	21
KE2 Combo Display – Cable	RJ-12 6P6C straight cable to connect KE2 Combo Display to KE2 Evap OEM controller – 25 ft.	21786	21
KE2 Compressor Panel	Designed for small to mid-sized racks. Eliminates using overly complicated controls designed for large systems. Supports up to 3 or 8 stages of loading through onboard relays. Configure relays as Fixed Speed Compressor, Compressor Unloader, Digital Scroll Compressor, Master Liquid Line Solenoid, or Hot Gas Defrost Relay. Add PN 21304 for digital unloader control. Add PN 21302 if using the 8th stage.	Up to 3 stages - 21961 Up to 8 stages - 21962	22
KE2 Compressor Sequencer OEM	Controller only. See KE2 Compressor Panel PN 21961 & 21962.	21768	22
KE2 Condenser Fan Control	Controller only. See KE2 Condenser Panel PN 21963.	21543	23
KE2 Condenser Panel (3 stages)	Energy efficient control of up to 14 condenser fans. 3 relay outputs for staging of fans or banks of fans. Multiple control options, including floating head pressure. VDC output for a VFD / EC Motors.	21963	23

Alphabetical Product Listing (continued)

Product Name	Description	Part Number(s)	Page Number
KE2 Controlled Environment	Replacement controller only. See KE2 Environment Panel PN 21999 for new installs.	20894	26
KE2 Evap for Rack Efficiency (KE2 Evap-RE)	Replacement controller only. See KE2 Evap-RE2 Panels PN 21673 & 21674 for new installs.	21631	26
KE2 Evap-RE2 Contactor Panel	Adaptive defrost, fan management, current monitoring, EEPR & EEV control and more in a pre-wired contactor panel that reduces installation time and possibility of mis-wiring.	21673 21674	20
KE2 Environment Panel	Controls both temperature and humidity with outputs for humidifier, dehumidifier, heat/reheat and more. KE2 Therm's unique algorithm adjusts superheat based on humidity, further aiding in maintaining or removing moisture from the space. Ideal for vegetables, fruits, meats, ripening rooms, curing rooms, clean rooms, tobacco storage, wine and more.	21999	21
KE2 Evap-RE2 Replacement Display	Replacement display for the KE2 Evap-RE2 Contactor Panel.	21806	20
KE2 Evap-RE2 Replacement Board	Replacement main controller for the KE2 Evap-RE2 Contactor Panel.	21610	20
KE2 Evaporator Efficiency	Controller for walk-in freezers and coolers with remote monitoring, diagnostics, email/text alerts, energy savings, frost reduction, and optional EEV control - for new equipment or upgrade of existing refrigeration equipment.	Multiple kit part numbers. See page 18.	18
KE2 Evap Panel (Single)	Provides energy savings, precise temperature control, frost reduction, and communications capability using the KE2 Evap OEM hardware. The panel replaces and performs the function of multiple mechanical components such as the thermostat, defrost time clock, defrost termination, and fan delay. It is able to control an electric expansion valve (EEV) to regulate superheat, but will also function with a mechanical thermostatic expansion valve.	21958	19
KE2 Evap Panel (Double)	Same benefits as the KE2 Evap Panel (Single), but with two controllers mounted inside instead of one. Allows easy setup of lead/lag redundant systems, control of a two evaporator system, or for a combo freezer & cooler walk-in.	21959	19
KE2-EM35	Replaced by KE2-EM Plus PN 21902 & 21920.	Discontinued	26
KE2-EM Cell	Same benefits of the KE2-EM Plus, but can be equipped with a GSM SIM card for internet access or backup access. SIM card not included.	21903	10
KE2-EM Plus	Provides a local dashboard, email/text alerts, and datalogging for up to 35 KE2 Therm wireless sensors & controllers. The KE2-EM Plus also serves as a local Wi-Fi access point for devices, and reliably publishes devices to the KE2 SmartAccess portal.	21902 21920 (w/BACnet)	10
KE2 Fan Control	Packaged solution optimizes energy efficiency of air cooled condensers. Incorporates Variable Frequency Drive (VFD) to match fan speed with varying load and ambient conditions.	Custom Product – Contact KE2 Therm.	23
KE2 Humidity Panel	Designed for sites that already have a KE2 Evap OEM installed, or require the humidity control to be mounted separately, the KE2 Humidity Panel provides all of the benefits of the KE2 Environment Panel when paired with an existing KE2 Evap OEM v3.0 or higher.	22006	21
KE2 LDA – Local Area Dashboard & Alarms	Replaced by KE2-EM Plus PN 21902 & 21920.	Discontinued	26
KE2 Low Temp + Defrost	Controller for low & medium temp refrigeration applications. Replaces thermostat, fan delay, defrost time clock & termination device. Ideal for truck stock. For new or existing equipment.	20903	17
KE2 SmartAccess	KE2 SmartAccess provides quick and easy real time access to your refrigeration systems 24/7. No port forwarding or VPN required.	21106	11
KE2 SmartGate	Pre-configured 10-port router.	20695	9
KE2 Temp + Air Defrost	Thermostat and air defrost timeclock in one controller, saving time and wiring. Ideal for truck stock. Easy to read digital display.	20611	16
KE2 Temp + Valve Control	Temperature and air defrost controller that also drives an EEV. Alternate modes available to drive an EEPR or EHGB valve to control pressure or temperature. Additional mode to act as controller for a mechanical subcooler. <i>R-410A requires 0 to 300 psig pressure transducer.</i>	21301, 21393	16
KE2 Terminal Board	Simplifies installation of KE2 Evap, KE2 Evap OEM, KE2 Low Temp & KE2 Adaptive.	20996	24
KE2 Service Tool App Kit	Access ethernet controller webpages with your phone or tablet, even if they are not internet connected.	iOS 22041, Android 22042	11
KE2 Wire Harness	9 wire, color coded harness for wiring the KE2 Evap, KE2 Evap OEM, KE2 Low Temp, and KE2 Adaptive.	10 ft. – 20736 25 ft. – 20670 40 ft. – 20737	24
Mounting Box	Simplifies installation and service of the KE2 Evaporator Efficiency controller.	20687	24
Pressure Transducer	0 to 150 psia	10 ft. – 20201 40 ft. – 20204	25

Alphabetical Product Listing (continued)

Product Name	Description	Part Number(s)	Page Number
Pressure Transducer	0 to 300 psig	10 ft. – 20208 40 ft. – 20711	25
Pressure Transducer	0 to 500 psig	10 ft. – 20202 40 ft. – 20712	25
Pressure Transducer	0 to 750 psig	10 ft. – 21872 40 ft. – 21873	25
Relay – 8th Compressor Stage / Digital Switch	For the KE2 Compressor Sequencer OEM, used to pilot contactor for 8th compressor stage, control master liquid line solenoid, hot gas solenoid or unloader valve with Aux Relay Board. Used to control reheat, humidifier, or de-humidifier with the KE2 Controlled Environment.	21032	25
Relay – Fan Motor Relay Kit	External Fan Relay Kit – Mechanical: (1) 120V Coil Relay; (1) 240V Coil Relay; wire harness, 4 spades, 2 screws – for KE2 Evap, KE2 Low Temp & KE2 Adaptive. Protects on-board fan relay from motor burnouts and motors without proper switching protection.	120V & 240V Coils – 21409	24
Relay – Fan Motor Relay (relay only)	For KE2 Evap, KE2 Low Temp & KE2 Adaptive. Protects on-board fan relay from motor burnouts and motors without proper switching protection.	120VAC – 21469 240VAC – 21470	24
Relay – Form A	Replacement for the KE2 Evap OEM fan relay.	21373	—
Relay – Form C	Replacement for the KE2 Evap OEM LLS relay, as well as relays 1 & 2 on the KE2 Condenser Fan Control / KE2 Comp. Seq. OEM.	21374	—
Relay – Solid State (N.O.)	Used with KE2 Compressor Sequencer OEM to pilot the bypass valve for a digital scroll compressor. Also used with KE2 Evap, KE2 Evap OEM, and KE2 Evap-RE2 to pilot PWM valves.	21304	25
Relay – Solid State (N.C.)	Used with KE2 Evap OEM as an alarm output for a buzzer, siren, strobe etc. Can be used to pilot a mechanical relay to signal a BMS or security system via a dry contact.	22005	25
Sensor Clip – Coil - 3/8 in.	Coil sensor mount for 3/8 in. circuit tube	20963	24
Sensor Clip – Coil - 1/2 in.	Coil sensor mount for 1/2 in. circuit tube	20964	24
Sensor Clip – Coil - 5/8 in.	Coil sensor mount for 5/8 in. circuit tube	20965	24
Sensor Clip – Suction Line - 1/2 in.	100-pk. of clips to securely fasten temp sensor to 1/2 in. suction line	21225	25
Sensor Clip – Suction Line - 3/8 in.	100-pk. of clips to securely fasten temp sensor to 3/8 in. suction line	21226	25
Sensor Clip – Suction Line - 7/8 in.	100-pk. of clips to securely fasten temp sensor to 7/8 in. suction line	21227	25
Sensor Clip – Suction Line - 1-1/8 in.	100-pk. of clips to securely fasten temp sensor to 1-1/8 in. suction line	21228	25
Sensor Clip – Suction Line Kit	(1) each of 1/2, 3/8, 7/8 & 1-1/8 inch suction line sensor clips	21229	25
Sensor – Current	Replacement CTs for the Current Sensor Board.	21614	20
Sensor – Humidity	For use with the KE2 Humidity Control & KE2 Controlled Environment, 40 ft. leads.	20651	25
Sensor – Temperature	Temperature sensor – NTC Thermistor Assembly. Operating Range -60°F to 150°F (-51°C to 65°C)	Multiple kit part numbers. See page 25.	25
Sensor – Temperature – Color	Set of blue, yellow, and green sensors, NTC Thermistor Assembly. Operating Range -60°F to 150°F (-51°C to 65°C)	15 ft. – 21151; 40 ft. – 21066	25
Sensor – High Temperature	For measuring discharge temperature – 15 ft. Operating Range -40°F to 302°F (-40°C to 150°C)	21230	25
Sensor Mount for Air Sensor	Used to position the air sensor in the return air the evaporator, pack of 20.	20606	25
Sensor – Wireless Temp & Humidity w/Remote Probe	KE2 Wireless Sensor for monitoring temperature and humidity. Use with the KE2-EM Plus.	(1) – 21633; (10) pack – 21688	10
Snaptrack	Snaptrack for use with the KE2 Evap OEM, KE2 Compressor Sequencer OEM, and KE2 Condenser Fan Control.	11 in. – 21324; (2) 3 in. pieces – 21415	—
System Off Switch	Utilize controller digital input to turn the System Off , without power cycling the system.	21934	25
Switch 8-port	8-port Ethernet switch	20166	9
Switch 16-port	16-port Ethernet switch	21011	9
USB to RS 485 Adaptor	Replacement USB to RS 485 adaptor for the KE2-EM Plus.	21354	—

Typical Refrigeration Network Diagram

KE2 Condensed Catalog - 411

Controllers, Communication, Parts & Accessories

KE2 Switch

The KE2 Switch forms the foundation of the local refrigeration network, and facilitates communications between controllers. Each controller is linked via an Ethernet cable to the KE2 Switch.

In addition to communication between controllers, connecting the switch to a KE2-Edge Manager (KE2-EM) will provide a local dashboard of controllers, local Wi-Fi access to controllers, and data logging. Providing internet access to the switch/KE2-EM allows further features such as email/text alerts and remote monitoring & control via KE2 SmartAccess.

BENEFITS SUMMARY

- Allows networked controllers to communicate with each other to coordinate defrost, refrigeration, lead/lag etc.
- Use as a connection point for multiple controllers to a KE2-EM, or to the local network for internet access, providing remote monitoring and control.

Network Switch: 8 port *pn 20166*; 16 port *pn 21011*

Specifications	
Construction	Sturdy Metal Case
Operating Temperature	-22°F to 150°F (-30°C to 66°C)
Interface	16 x 10/100/1000 Mbps Auto-MDIX RJ-45 ports
Standards	IEEE 802.3 10Base-T; IEEE 802.3u 100Base-TX; IEEE 802.3ab 1000Base-T; IEEE 802.3x Flow Control; IEEE 802.3az Energy Efficient Ethernet (16 port)
Network Media	Gigabit Ethernet: Cat 5e and 6 up to 328 ft. (100 m)
Diagnostic LEDs	Power, Link/AST, Speed

Additional Literature

KE2 SmartGate

The KE2 SmartGate is pre-configured for plug and play setup of the refrigeration network. Simply plug an Ethernet based controller into one of the LAN ports, connect your device to the Wi-Fi, and open your KE2 Service Tool App. Any connected controllers will be discovered and accessible right from your phone or tablet.

The KE2 SmartGate is also a powerful piece of network equipment. It allows speedy communication to and between controllers for small or larger installs.

BENEFITS SUMMARY

- Pre-configured – eliminates the need to configure the network
- Industrial grade – increased speed and durability
- Provides 9 LAN ports – reduces the need for a switch
- Not an IT guy...Not a problem!

Additional Literature

KE2 SmartGate *pn 20695*

General Features	
Industrial Grade	✓
LAN Ports	9
Gigabit Support	✓
Serial Console	✓
POE (Power Over Ethernet)	✓
Shielded Ports	✓
Fiber	✓
Wired and Wireless Models	✓
Supports > 20 Devices	✓
Enterprise Ready	✓
Temp Range	-30°F (-35°C) to 150°F (+65°C)
Humidity Range	Max. 90% (non-condensing)

Specifications		
CPU		600MHz
Memory		128MB
Ethernet	Gigabit Ports	5
	10/100 Ports	5
Wireless		802.11 B/G/N
Expansion		Fixed Gigabit Ethernet SFP cage
USB		Micro USB (powered)
POE		ETH1 (8 - 28v DC)
Antenna Gain		4dbi
TX Power		30dBmDH

KE2-EM Plus

for use with KE2 Wireless Sensors and KE2 Therm controllers

The KE2-Edge Manager Plus (KE2-EM Plus) automatically finds and dashboards up to 35 KE2 Therm controllers and KE2 Wireless Sensors.

The KE2-Edge Manager creates a common dashboard that integrates KE2 sensor data with in-depth system operational information from KE2 Therm controllers.

The local dashboard can be accessed via the on-board Wi-Fi, or through the local network. The Wi-Fi provides a convenient access point to controllers while working on the refrigeration system, while graphs and datalogs can be accessed from a PC on the local network.

When provided internet access either via the on-site network or from cellular, the KE2-EM can send email or text alerts. The controllers or sensors can also be published to the KE2 SmartAccess portal for remote access & control.

PN 21902 – KE2-EM Plus
PN 21920 – KE2-EM Plus (w/ BACnet)*
PN 21903 – KE2-EM Cell
PN 21926 – KE2-EM Cell (w/ BACnet)*
PN 21924 – KE2-EM Plus/Cell
Mounting Bracket

*Does not support BBMD.

KE2-EM Plus Kit – pn 21902, 21920, 21903, 21926

KE2-EM Plus Manager - Communication Device

(1) 5 ft. Ethernet Cable

(1) RS-485 USB Adapter - for KE2 Therm Modbus controllers

Power Cord

BENEFITS SUMMARY

- Detailed graphs with time stamps
- Bridge to existing Wi-Fi networks
- Provides a wireless access point
- Serves as a BACnet/IP Gateway (with license)
- Remote access for all connected KE2 Therm devices via KE2 SmartAccess
- High-accuracy temp & humidity readings
- Send email or text alerts for all connected KE2 Therm devices, to multiple recipients
- Connect Ethernet controllers with older firmware to KE2 SmartAccess without requiring controller upgrades

Additional Literature

KE2-Wireless Sensors

for use with KE2-EM Plus, KE2-EM Cell

Water resistant and portable, the KE2-Wireless Sensor is a high-precision digital temperature and humidity indicator. The wireless signal and light-weight design mean installation takes just seconds. And, the sensor's 1.5-year battery life ensures low maintenance and extended performance. The 3 foot probe lead allows the transmitter to be positioned outside of the monitored space for better reception at the KE2-EM.

Common applications are: laboratory, agricultural, communications, storage facilities, warehouses, refrigerated spaces, medical, and hospitality.

KE2-Wireless Sensors

KE2 Wireless Sensor w. Remote Probe	pn 21633
(10) pack KE2 Wireless Sensor w. Remote Probe	pn 21688

Additional Literature

BENEFITS SUMMARY

- High-accuracy digital temperature and humidity sensor
- Configurable location name
- Wireless signal - using BLE 4.1 (Bluetooth Low Energy device)
- Email/text alerts (see list below)
- IP66 water resistance level
- 300 ft. (91 m) line of sight broadcasting range
- 1.5-year battery life (two AAA batteries)
- Low battery indicator
- 12-month free KE2 SmartAccess portal license
- Very fast start-up and measurement time
- Real-time data tracking, storing, & uploading
- KE2-EM Cell version can be equipped with a GSM SIM card for internet access or backup access. SIM card not included.

ALARMS

- High/low temp w/adjustable time delay
- High/low humidity w/adjustable time delay
- Disconnect alarm – KE2 Edge Manager loses contact with sensor
- Device loss alarm – KE2-Wireless Sensor loses contact for an extended period
- Portal Disconnect Alarm (optional)
- Low battery indicator

KE2 Service Tool App

The KE2 Service Tool App turns your phone temporarily into a KE2-Edge Manager and Wi-Fi service tool, providing hundreds of dollars in features to you for FREE.

Access controller webpages with your phone or tablet, even if they are not internet connected. Simply connect to the same network that the controllers are plugged into and the KE2 Service Tool App will quickly discover and display all KE2 Therm controllers on the network. Or, use a tested Apple or Android Ethernet dongle to plug your phone directly into a controller with an Ethernet cable.

The KE2 Service Tool App will display a dashboard of all available controllers from which you can change setpoints, initiate defrosts, and view historic data. The tool also allows you to backup and restore setpoints, as well as update controllers using your smart device.

The app can also use your phone's mobile internet connection to publish controllers to KE2 SmartAccess, meaning your home office or KE2 Therm technical support can watch the system in real time with you, making it easier to troubleshoot system issues over the phone.

KE2 Service Tool App Kits – Apple pn 22041, Android pn 22042

- (1) 20 ft. Ethernet Cable
- (1) Apple (lightning) or Android (USB-C) to Ethernet dongle
- (1) Polyweave water resistant bag

BENEFITS SUMMARY

- Accessing your controllers is easier than ever, automatically finds and dashboards any controllers it can see.
- Connect to the controller network or plug into the controller directly.
- View real time status of controller temperatures, pressures, relay status etc.
- Access the 30 days of built-in graphs and datalogs on controllers.
- Setpoints can be viewed and changed
- Allow others to view the controller with you in real time.
- Update controllers from your smart device.

Additional Literature

KE2 SmartAccess

KE2 SmartAccess is your personal secure portal for remote access and monitoring of KE2 Therm devices. Simply provide the controller or KE2-Edge Manager with internet access, enable KE2 SmartAccess, and start accessing your systems from anywhere internet is available for a nominal monthly fee.

Whether managing one location or one hundred locations, KE2 SmartAccess will present your KE2 Therm devices to you in an easy to understand dashboard. Change setpoints, initiate defrosts, setup email/text alerts, view datalogs, generate reports and more, all from your KE2 SmartAccess portal.

Ethernet Cable

CAT5e shielded Ethernet cable for commercial/industrial temperature range. Shielding helps prevent noise interference with communications. Shielded RJ-45 connections are attached.

CAT5e Shielded Ethernet Cable – 50 ft.
pn 20185

CAT5e Shielded Ethernet Cable – 100 ft.
pn 20167

Ethernet Adaptor Kit

pn 20938

Provides easy access to the Ethernet port on the backside of the KE2 Evaporator Efficiency controller. Once the adaptor is connected, there is no need to remove the controller from the mounting screws to reach the Ethernet connection.

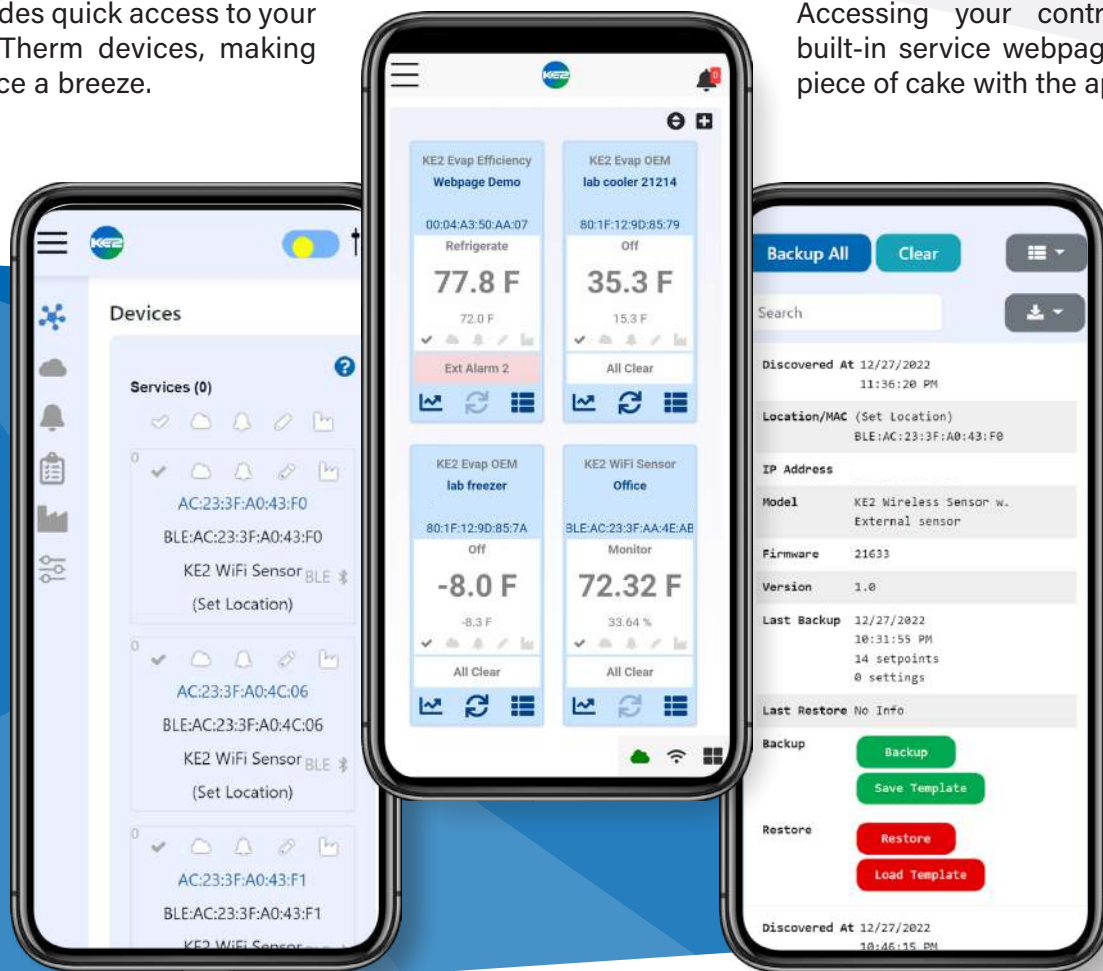

SERVICE TOOL WITH KE2 SMARTACCESS

Quick access

The KE2 Service Tool App provides quick access to your KE2 Therm devices, making service a breeze.

Easier than ever

Not an IT guy? Not a problem! Accessing your controller's built-in service webpage is a piece of cake with the app.

The KE2 Service Tool App will find any connected controllers and automatically create a dashboard on your phone or tablet. Tap any controller on the dashboard to pull it up - it's that easy.

- 1 → Connect to the controller network or plug in directly with an ethernet dongle*.
- 2 → Open the app.
- 3 → Start accessing your controllers!

*KE2 Service Tool App Kits – Apple PN 22041, Android PN 22042

SERVICE TOOL
WITH KE2 SMARTACCESS

Troubleshooting

Your refrigeration system has never been easier to troubleshoot. View real time status of the controller temperatures, pressures, valve positions, relay status, alarms & more.

Your controller has something to tell you!

Many controllers have 30 days of built-in graphs and datalogs. See exactly what happened and eliminate guess work.

You're in control.

All setpoints can be viewed and changed via the app. Backup and restore setpoints as well, speeding up setup of multiple controllers. Initiate defrosts or pumpdown the system from the app.

You're not alone!

Allow others to view the controller with you in real time via KE2 SmartAccess. While connected, the app will use your smart device's internet connection to allow your home office, equipment manufacturer, or KE2 Therm tech support to troubleshoot with you.

KE2 Temp + Air Defrost

The KE2 Temp + Air Defrost simplifies refrigeration controls by combining the functions of a thermostat and air defrost time clock — increasing functionality and reducing wiring. This also makes it ideal for truck stock. Customers also appreciate the large display and blue LEDs, allowing the temperature to be read from a distance.

The KE2 Temp is accessible remotely using the KE2-Edge Manager (KE2-EM), a simple, multi-functional, communication device. The KE2-EM will automatically find any connected KE2 Temp + Air Defrost controllers and provide immediate local network communication.

KE2 Temp +Defrost

Kit 2 – pn 21322

KE2 Temp controller

(1) 10 ft. blue, black or green temperature sensor pn 20199

Installation hardware

Temp sensor (1)

BENEFITS SUMMARY

- Ideal for truck stock – Eliminates an air defrost time clock and a thermostat.
- Simplifies wiring, saves installation time.
- When used with the KE2-Edge Manager, displays a local dashboard showing connected controllers.
- Visual alarms on the display, and alarm notifications via text or email when used with the KE2-Edge Manager.
- Over a year of temperature data logging when used with the KE2-Edge Manager.
- Off time defrost on a predefined, or custom schedule.
- Compressor protection – adjustable maximum compressor starts per hour.
- 1st defrost 2 hrs after start up.
- 120V / 208-240V
- Keypad lock feature.

Additional Literature

KE2 Temp + Valve Control

Like the KE2 Temp + Air Defrost, the KE2 Temp + Valve Control replaces the thermostat and defrost time clock for air defrost applications, simplifying the installation. In addition, the KE2 Temp + Valve Control has the ability to drive an electric expansion valve (EEV) to control superheat, or an electric evaporator pressure regulator (EEPR) or electric hot gas bypass (EHGB) valve to control to a specific temperature or pressure. Further, Subcool mode allows the KE2 Temp + Valve to be applied to a mechanical subcooler, modulating an EEV to control the liquid temperature of the refrigerant leaving the brazed plate heat exchanger.

KE2 Temp + Valve

45 inch temp sensor (1) 10 ft. temp sensor (1)

10 ft. pressure transducer (1)

BENEFITS SUMMARY

- Controls an EEV, EEPR, or EHGB providing much tighter system control than possible with mechanical controls.
- Great for truck stock - can be used as thermostat and defrost clock on air defrost applications, or as thermostat only for electric defrost. Compatible with TEVs and most common EEVs & refrigerants.
- Simplifies wiring, saves installation time.
- When used with the KE2-Edge Manager, displays a local dashboard showing connected controllers.
- Visual alarms on the display, and alarm notifications via text or email when used with the KE2-Edge Manager.
- 366 days of temperature data logging when used with the KE2-Edge Manager.
- Off time defrost on a predefined, or custom schedule.
- The subcool control mode allows the KE2 Temp + Valve to be applied to mechanical subcoolers.
- Compressor protection – adjustable maximum compressor starts per hour.
- Manual defrost.
- Keypad lock feature.

Additional Literature

KE2 Low Temp + Defrost

Controller for low & medium temp refrigeration applications. For new or existing equipment. Serves the function of multiple components: replaces thermostat, fan delay, defrost time clock & termination device. Versatile controller ideal for truck stock.

KE2 Therm fan management allows tighter temperature control and saves energy. California Title 24 compliant evaporator fan management option available when used with a single fixed speed compressor.

Installation hardware

KE2 Low Temp + Defrost

10 ft. temp sensors (2)

BENEFITS SUMMARY

- Off time or electric defrost on pre-defined schedule or custom defrost interval.
- Ideal for truck stock – Replaces defrost time clock, thermostat, defrost termination, and fan delay.
- Simplifies wiring, saves installation time
- KE2 Therm fan management allows tighter temperature control and saves energy. Title 24 compliant option available.
- Regulates the amount of defrost heat to prevent steaming.
- Optional Door Switch with all the necessary time delays.
- Controllers can connect to KE2 SmartAccess portal with the KE2-Edge Manager.
- Visual alarms on the display, built-in buzzer, and alarm notifications via text or email when used with the KE2-Edge Manager.
- Over a year of temperature data logging when used with the KE2-Edge Manager.
- Compressor protection – adjustable maximum compressor starts per hour.
- Keypad lock feature.

Additional Literature

KE2 Adaptive Control

Energy saving controller for low & medium temp refrigeration applications. For new or existing equipment. Serves the function of multiple components: replaces thermostat, fan delay, defrost time clock & termination device.

Includes unique energy saving demand defrost algorithm based on the efficiency of the evaporator, third party verified to provide 20%+ energy savings.

KE2 Therm fan management allows tighter temperature control and saves energy. California Title 24 compliant evaporator fan management option available when used with a single fixed speed compressor.

BENEFITS SUMMARY

- Unique defrost initiation based on evaporator efficiency, third-party verified to provide 20%+ energy savings.
- KE2 Therm fan management allows tighter temperature control and saves energy. Title 24 compliant setting available.
- Controllers can connect to KE2 SmartAccess portal with the KE2-Edge Manager
- When used with the KE2-Edge Manager, displays a local dashboard showing controllers connected to the KE2-EM.
- Visual alarms on the display, built-in buzzer, and alarm notifications via text or email when used with the KE2-Edge Manager.
- Over a year of temperature data logging when used with the KE2-Edge Manager.
- Regulates the amount of defrost heat to prevent steaming.
- Optional Door Switch with all the necessary time delays.
- Off time or electric defrost on demand, pre-defined schedule, or custom interval.
- Keypad lock feature.

Additional Literature

KE2 Evaporator Efficiency

Flagship energy saving controller for low & medium temp refrigeration applications with built-in remote monitoring & diagnostics capability. For new or existing equipment. Serves the function of multiple components: replaces thermostat, fan delay, defrost time clock & termination device.

Able to drive an electric expansion valve (EEV) for increased energy efficiency, temperature control, and monitoring, however, works with mechanical TEV as well. Order additional temperature sensor and pressure transducer for EEV control.

Includes unique energy saving demand defrost algorithm based on the efficiency of the evaporator, third party verified to provide 20%+ energy savings.

KE2 Therm fan management allows tighter temperature control and saves energy. California Title 24 compliant evaporator fan management options available for single or multiple compressor applications.

BENEFITS SUMMARY

- Improved product integrity and reduced spoilage – elimination of unnecessary defrost cycles reduces freezer burn, and temperature spikes, which degrade product quality.
- Energy savings through identification of system performance issues using graphing and data logging feature.
- Maximizes energy efficiency with less compressor run time resulting from precise evaporator fan management and reduced defrost time.
- Improved evaporator performance due to utilization of frost on the evaporator.
- Reduces liability by eliminating ice buildup on floors.
- Alarm notification text/email.
- Remote monitoring & system control.
- 30 day graph of room and coil temperature. Built-in data log provides 30 days of system operation history.
- Over a year of temperature data logging when used with the KE2-Edge Manager.
- For new equipment or upgrade of existing equipment.
- Integrate with Building Management Systems. BACnet/IP available with KE2-Edge Managers (does not support BBMD).

Additional Literature

KE2 Evap OEM

Provides the same energy saving control for low & medium temp refrigeration applications with built-in remote monitoring & diagnostics capability as the KE2 Evaporator Efficiency. For new or existing equipment. Serves the function of multiple components: replaces thermostat, fan delay, defrost time clock & termination device.

Able to drive an electric expansion valve (EEV) for increased energy efficiency, temperature control, and monitoring, however, works with mechanical TEV as well. Order additional temperature sensor and pressure transducer for EEV control.

Includes unique energy saving demand defrost algorithm based on the efficiency of the evaporator, third party verified to provide 20%+ energy savings.

KE2 Therm fan management allows tighter temperature control and saves energy. California Title 24 compliant evaporator fan management options available for single or multiple compressor applications.

Built-in lead/lag control over Ethernet allows switchover between two KE2 Evap OEM controllers based on time or every run cycle without any external timers or additional controls.

Humidity control options available with the addition of the KE2 Humidity Control auxiliary board.

Controller only option available for OEM applications or replacement. Panel options available for retrofit of existing systems or field install of evaporators without controls.

Additional Literature

KE2 Evap-RE2 Contactor Panel

Saves time and eliminates the potential for on site errors. Ideal for refrigeration applications that require fan and/or defrost contactors. Pre-wired to make installation easy. Provides energy savings, precise temperature control, frost reduction, and advanced communications capability. Able to control up to (3) EEVs with additional Aux Valve Drivers. Able to drive electric evaporator pressure regulator (EEPR) or electric hot gas bypass (EHGBP) valve to control room temperature. Programming specific to control evaporators on rack systems.

On-site wiring of controller related components is simplified. Plus the contractor panel provides consistent setup across locations, making return service visits more productive, reducing both installation time and system downtime. Built-in Wi-Fi allows easy access to controller webpages while in front of the panel with smartphone, tablet, or laptop.

Additional Literature

KE2 Humidity Control

The KE2 Humidity Control is the most energy efficient approach to achieve your humidity goals. As an auxiliary board to the KE2 Evap OEM, it is designed to add humidity control and monitoring to refrigerated spaces with the KE2 Evap OEM. It can also be used in applications where both heat and refrigeration are required.

When added to new or existing KE2 Evap OEM installs (updated to v3.0 or higher), the KE2 Humidity Control provides logic for humidity control & adds outputs for a humidifier, dehumidifier, heat/reheat, and a schedule based output.

If used with an Electric Expansion Valve (EEV), the system will also modulate superheat to increase or decrease runtime, based on the current humidity and humidity target. This unique control

aids in providing additional dehumidification or minimizing the amount of dehumidification during refrigeration.

The KE2 Humidity Control is ideal for applications with specific humidity and temperature requirements, such as: Meat curing rooms, Growth chambers, Green houses, Ripening Rooms, Clean rooms, Paper & document storage.

KE2 Humidity Control pn 22003

Auxiliary board only

BENEFITS SUMMARY

- Auxiliary board for the KE2 Evap OEM controller (requires KE2 Evap OEM to function).
- Improved product integrity through precise regulation of the conditioned space's humidity and temperature.
- Reduced spoilage and shrinkage by defrosting only when necessary, maintaining desired humidity level, and providing more consistent temperature control.
- Outputs for reheat, dehumidifier, humidifier, and schedule based output for lights etc.
- Remote monitoring & system control with KE2 SmartAccess.
- 30 day built-in graph of room temp, coil temp, and relative humidity. Over a year of data storage available with the KE2-Edge Manager.
- For new or existing equipment. Existing controllers can be updated to KE2 Evap OEM firmware v3.0+ to work with the KE2 Humidity Control.

Additional Literature

KE2 Combo Display

Combines the functionality of a temperature display, lighting control, panic alarm, temperature alarm, and a door heater controller. Three configurations: Stand-alone, Paired with one KE2 Evap OEM controller, or paired with two KE2 Evap OEM controllers.

Accessories

25 ft. Cable	pn 21786
Junction Box	pn 21782
KE2 Panic Button Kit	pn 21801
9V Rechargeable Battery	pn 21781

BENEFITS SUMMARY

When applied stand-alone:

- Controls door heaters to reduce energy required to maintain frost free door frame.
- Combined with KE2 Therm's panic button, provides safety for anyone in the refrigerated space.
- Lighting control integrates with door switch to automatically turn lights on & off.
- Serves as a temperature display and alarm.

When used with KE2 Evap OEM:

- Email/text alerts can be sent for alarms originating from the KE2 Combo Display, as well as from the KE2 Evap OEM controller(s).
- Information from the KE2 Combo Display is added to KE2 Evap OEM webpages.
- KE2 Combo Display provides the ability to change additional KE2 Evap OEM setpoints not available from the basic display.

Additional Literature

KE2 Compressor Sequencer OEM

Controls up to 3 stages of loading from the main board, and up to 8 stages of loading with the addition of an Auxiliary Relay board.

Suction pressure can be controlled to a fixed setpoint or allowed to float for maximum efficiency.

Each stage of loading can be set to: fixed speed compressor, variable speed compressor¹, digital compressor^{1,2} or unloaders. Relays for the stages can alternatively be set to control a Master Liquid Line Solenoid, or as a Hot Gas Defrost Relay.

Complete remote access is available during startup with a few simple button presses and an Internet connection.

Intended for retrofits or new installs, the KE2 Compressor Panel includes the controller pre-mounted in a UL-508 panel. The panel is available for 3 stages or 8 stages, the 8 stage version includes the Auxiliary Relay board also pre-mounted in the panel.

If controlling the digital compressor bypass valve for a digital scroll, include the solid state relay *pn 21304*.

If using the 8th stage, include the digital switch relay, *pn 21032*.

¹ One per suction Group

² Controller is designed to operate with a Copeland Scroll Digital Compressor when Digital Compressor is selected.

BENEFITS SUMMARY

- Designed for small to mid-sized racks - eliminates complicated controls designed for larger systems.
- Supports up to 3 stages of loading with onboard relays. Up to 8 stages can be controlled with the addition of an Auxiliary Relay board.
- Will automatically equalize runtime of compressors with equal HP.
- 30 day graph of capacity and suction pressure.
- Built-in data log provides 30 days of system operation history.
- Controller webpages allows tech to quickly assess system's operation.
- Works as a stand-alone rack controller or with other KE2 Therm controllers.
- Can limit the amount of defrost load, as dictated by the site's electrical requirements.

Basic Display with 18 in. Cable - 3 digit LED

pn 21387

Basic Display with 5 ft. Cable - 3 digit LED

pn 21878

Replacement Cable - 5 ft.

KE2 Fan Control

The KE2 Fan Control provides a simple packaged solution to optimize energy efficiency of air cooled condensers. This package incorporates Variable Frequency Drive (VFD) technology to match fan speed with the varying load and ambient conditions. Custom part numbers, contact KE2 Therm for selection.

Options

230V, 460V or 575 V, 3-phase

Available for 2 to 14 fan condensers

Available for split condensers

Motor starters with short circuit and thermal protection

Interlock VFD/constant speed contactors

Optional drop leg or ambient temp control

Optional two drive model for dual circuit condensers

Includes the KE2 Condenser Fan Control, see Q.2.51 for more information.

BENEFITS SUMMARY

- Typically condensers are sized for conditions that are experienced less than 5% of the time. The KE2 Fan Control package contains proprietary algorithms that match system conditions with equipment operation, providing the highest levels of efficiency, improving system operation and saving money.
- Remote monitoring and system control, plus Email/text alerts. 30 day datalog available with the KE2 Condenser Fan Control.

Additional Literature

KE2 Condenser Fan Control

The feature-rich KE2 Condenser Fan Control allows for the control of up to 14 fans, on up to two separate interlaced circuits sharing a common fans. With five control modes, each of which offer four control types the KE2 Condenser Fan control can work in most applications, and the controller is California Title 24 compliant. Several of the control methods allow for floating head pressure.

The KE2 Condenser Panel includes the controller mounted in UL-508 panel, with 0-10VDC output to control a VFD, variable speed **EC motors**, or relays to pilot contactors for 3 fans or 3 banks of fans when staging fixed speed fans.

Accessories

Pressure Transducers

0 - 500 psig, 10 ft. lead - for head pressure pn 20202

0 - 500 psig, 40 ft. lead - for discharge pressure pn 20712

Temperature Sensors

High temp sensor for discharge, 15 ft. pn 21230

Standard temp sensor for all other temp inputs, 10 ft. pn 20199

Standard temp sensor for all other temp inputs, 40 ft. pn 20200

Replacement Relays

Replacement Form C Relay for Main Board pn 21374

Replacement Fuses

Replacement incoming power fuse for Main Board pn 21375

BENEFITS SUMMARY

- FIVE CONTROL MODES:**
 - Fixed (Head) Pressure
 - Saturated Temp to Ambient Air Temp
 - Subcooling (drop leg temperature)
 - Condenser Liquid Temp to Ambient Air Temp
 - Condenser Inlet to Condenser Outlet Temp
- FOUR CONTROL TYPES:**
 - Stage Fixed Speed Fans
 - VFD
 - **EC Motors**
 - **EC Motors** w/Fixed Speed Motors
- Alarm notification text/email.
- Remote monitoring & system control.
- Onboard communication-TCP/IP & easily connected KE2 SmartAccess.
- Select from many common refrigerants.
- Automatic split mode based on ambient and load. Manual split mode based on digital input.
- Can control 12VDC bipolar stepper valve to act as holdback valve to maintain minimum head pressure.

Accessories & Replacement Parts

10 ft. Wire Harness *pn 20736* Color coded wires, with connectors corresponding to the controller's inputs, simplify installation of KE2 Therm controllers. This reduces on site wire preparation time, and eliminates the need to stock multiple wire gauges, colors and connectors. Stranded wires used in the harness are flexible, and easier to pull and route.

25 ft. Wire Harness *pn 20670*

40 ft. Wire Harness *pn 20737*

Function	Color		Gauge	Wire Ends
Power	black with white stripe	L1	16 AWG	stripped and retained
Power	white with red stripe	L2/neutral	16 AWG	stripped and retained
Ground	green		16 AWG	stripped and retained
Defrost Heat	orange with black stripe		12 AWG	flag connectors
Defrost Heat	black with orange stripe	L1	12 AWG	flag connectors
Fans	blue with black stripe		14 AWG	flag connectors
Fans	black with blue stripe	L1	14 AWG	flag connectors
LLS/Compressor	yellow with black stripe		16 AWG	stripped and retained
LLS/Compressor	black with yellow stripe	L1	16 AWG	stripped and retained

Mounting Box *pn 20687*

40 mil embossed aluminum, box measures 12.3 x 6.4 x 2.0 inches and includes the necessary hardware to mount the box and controller. Provides a stationary location to attach conduit. Sized to accommodate the controller's wiring and service loops. Stamped aluminum blends into the refrigeration environment - clean appearance to the finished install.

Mounting Box with Wire Harness

Use with the KE2 Evaporator Efficiency.

KE2 Terminal Board *pn 20996*

Standardizes the wiring for every install. Board is marked with well known symbols for the fan, heaters, and LLS, making future diagnostics instantly recognizable. Built in fuse on the terminal board protect every relay on the controller from power surges. Board has mounting position for an *EC Motor Relay*. (Relay sold separately.)

Buzzer & Light 120VAC/DC *pn 20973*

Buzzer & Light 230VAC/DC *pn 21294*

22 mm, 25 mA audible (80dB at 4 in. /10 cm) buzzer annunciator with non-replaceable LED indicator.

Sensor Coil Clips

$\frac{3}{8}$ in. circuit tube *pn 20963*

$\frac{1}{2}$ in. circuit tube *pn 20964*

$\frac{5}{8}$ in. circuit tube *pn 20965*

For widely spaced evaporator fins. Rather than pressing fins together to hold the sensor bulb, bulb inserts in the spring, which then clips to the evaporator circuit tube.

Sensor sold separately.

Flag Quick Disconnects – 50 pack *pn 20640*

90° Insulated, 16-14 AWG

Ideal for connections with limited space.

Door Switch *pn 20543*

Designed for high traffic. Reed switch hermetically sealed in PVC shock absorber, enclosed in solid aluminum housing. Wires in 36 inch stainless steel armored cable. Adjustable L-shaped bracket, universal mounting, and greater pulling power.

- Contact - 22AWG 36 in. leads
- Contact Rating 10 VA
- Contact Type - Normally Open
- Max. Carry Current 2 Amp
- Max. Switching Current .5 Amp
- Breakdown Voltage - 250 VDC
- Operating Gap 2 in.
- Temperature Range 32°F to 120°F (0°C to 49°C)

Fan Motor Relays

The Fan Motor Relays are designed to protect the controller's onboard relays from transient voltages, back EMF, and motor burnouts.

120VAC, Relay Only *pn 21469*

240VAC, Relay Only *pn 21470*

Fan Motor Relay Kits - Mechanical

Includes fan motor relay or relays, wire harness, and screws to easily install on the KE2 Terminal Board.

- 120VAC & 240VAC Relay Kit *pn 21409*
- 120VAC Relay Kit *pn 21824*
- 240VAC Relay Kit *pn 21823*

Use with the KE2 Evaporator Efficiency, KE2 Low Temp, and KE2 Adaptive.

2-pin Connector *pn 20914*

3-pin Connector *pn 20915*

5-pin Connector *pn 20916*

For use with the KE2 Evaporator Efficiency, KE2 Evap-RE, and KE2 Controlled Environment.

Suction Line Temperature Sensor Clips

½ in. suction line - 100 pack pn 21225

⅝ in. suction line - 100 pack pn 21226

⅞ in. suction line - 100 pack pn 21227

1-¼ in. suction line - 100 pack pn 21228

Kit (1) of each ½", ⅝", ⅞", 1-¼" pn 21229

Securely fasten the suction temperature sensor to the suction line.

Humidity Sensor pn 20651

Pre-configured and pre-wired with a 40 ft. lead. For use with the KE2 Humidity Control auxiliary board for the KE2 Evap OEM controller.

If sensor is located more than 40 ft. from the controller, cable can be extended to 100 ft. using 18/3 stranded, shielded cable.

System Off Switch pn 21934

Practice excellence in refrigeration system stewardship by utilizing the digital input to turn the System Off, without power cycling the system. Comes with 15" colored lead wires, and grommet that will fit in controller knockouts. For use with all controllers except KE2 Temp + Air Defrost. Acts as bypass when used with KE2 Condenser Fan Control.

Digital Switch Relay pn 21032

This relay is required for the 8th stage/output on the Aux Relay Board when used with the KE2 Comp. Seq. OEM.

- 15A resistive/ 10A inductive load rated contacts @110V
- 12 VDC coil can be connected directly to the Aux Relay Board
- Used for controlling external compressor contactor, unloader, master LLS or Hot Gas Defrost relay
- Comes with DIN rail mountable base

Solid State Relay

Relay - Solid State (N.O.) pn 21304

Use with KE2 Compressor Sequencer OEM to pilot the bypass valve for a digital scroll compressor. Use with KE2 Evap, KE2 Evap OEM, and KE2 Evap-RE2 to pilot PWM valves. Can also be used to pilot a mechanical relay to signal a BMS or security system via a dry contact.

Relay - Solid State (N.C.) pn 22005

Use with KE2 Evap OEM as an alarm output for a buzzer, siren, strobe etc. Can also be used to pilot a mechanical relay to signal a BMS or security system via a dry contact.

Fuses (Sold in packs of 5 - part number is for 5 pack)

½ Amp pn 20699 – 250V, 0.5A Time Delay Glass; Replacement fuses for KE2 Evap, KE2 Evap-RE and KE2 Controlled Environment

1 Amp pn 21375 – 250V, 1.0A Time Delay Ceramic; Replacement fuses for Main Board of KE2 Evap-OEM, KE2 Compressor Sequencer OEM, KE2 Condenser Fan, KE2 Combo Display and Aux Relay Board

3 Amp pn 21029 – 250V, 3.0A Fast Acting Ceramic; Replacement LLS fuses for the KE2 Terminal Board

5 Amp pn 21628 – 250V, 5.0A Time Delay Glass; Replacement fuse for the relays on the Aux Relay Board

12 Amp pn 21031 – 250V, 12A Time Delay Ceramic; Replacement fan fuses for the KE2 Terminal Board

20 Amp pn 21030 – 250V, 20A Fast Acting Ceramic; Replacement defrost fuses for the KE2 Terminal Board

Electronic Expansion Valves

KE2 Refrigeration Stepper Valve (KE2 RSV)

For use with R-22, R-134a, R-422D, R-422A, R-407C, R-407A, R-507, R-404A, R-513A, R-450A, R-449A, R-448A, R-744, R-410A, R-407F, R-409A, R-408A, R-438A, R-452A, R-458A, R-290, R-32, 454A, 454C, 455A

The KE2 Therm RSV electric expansion valve is a stepper motor actuated valve, designed for refrigeration applications. The RSV uses a unipolar stepper motor that provides high precision control. Upgrading your system with an RSV and KE2 Therm controller will increase system efficiency, provide the best, most consistent superheat control, and eliminate the headache of adjusting superheat. Nominal capacities from 1 to 19 tons in R-404A.

BENEFITS SUMMARY

- High precision bi-directional control
- 4-phase, unipolar stepper motor
- Neodymium-iron-boron magnet rotor
- 500 steps for high resolution control
- 30 to 90 per second step rate
- External, replaceable coil – 5-wire
- Low power consumption

Valve Selection Program

KE2 EEV Retrofit Kits

The KE2 Temp + Valve controller in combination with the KE2 RSV handle a much wider range of operating conditions, for optimal control even during low head pressures/low ambient conditions. The KE2 EEV Retrofit Kits include the components you need to easily retrofit an evaporator with an EEV for use with new energy efficient condensing units.

- No transformer necessary for 120V or 208-240V applications
- Replaces timed clock for air defrost
- No complicated programming
- No complicated selection
- Replaces thermostat
