

## OVERVIEW

The GR2400 family of Photosensors are available in a variety of styles for indoor or outdoor use, supporting daylight harvesting or switching applications on GR2400, Micropanel, or BlueBox LTD products. The following styles are available:

1. 2-Wire Global Indoor Photosensor may be combined with a photocell card to provide up to 14 different trigger points, each controlling a unique relay group in as many as 64 relay panels. Each dimmer may be separately controlled to maintain a unique light level.
2. 3-Wire Local Indoor Photosensor is used with the *MicroPanel*, Blue Box LTD, or other integrated distributed control panels which have on-board photosensor inputs such as XPoint devices.
3. 3-Wire Local Indoor Slimline Photosensor is the same as 3-Wire Local Photosensor but with a smaller footprint making it ideal for mounting directly onto luminaires.
4. 2-Wire Global Outdoor Photosensor may be combined with a photocell card to provide up to 14 different trigger points, each controlling a unique relay group in as many as 64 relay panels. Each dimmer may be separately controlled to maintain a unique light level.

## FEATURES

- Small and discrete ceiling or fixture mounting options
- Extended sensitivity range; no adjustment needed
- Low voltage power

## SPECIFICATIONS

### 2-WIRE GLOBAL INDOOR

- Mounting Diameter: 1"
- Sensitivity: 0-100 fc
- Application: Indoor Switching or Preset Dimming (Open or Closed Loop)
