

## Version 4.2.4 Release Notes

Pathscape Software	Pathscape v4.2.4
Release Date	September 1, 2021
Legacy VIA (673x, 674x)	Firmware v3.10.0
VIA (Rack-mount, DIN-mount), Pathport, Network Fade Processor, Vignette Clock	Firmware v6.1.5

The biggest change with release 4.2.4 is the change of Device Type naming convention (nomenclature). Below are further details and other changes to both Pathscape and the firmware shipped with this install.

New Features	
New Device Type Descriptions	The entire Pathway catalog of products has undergone nomenclature/part number changes, to streamline current and future product names and ordering processes. Some names have been dropped, such as Pathport “sub-brand” names like OCTO and QUATTRO and are now referred to more generically such as “Pathport 8-Port Rack-mount”. Some products’ names have changed less or not at all, e.g. “Vignette Clock”. <i>Figure 1</i> 

Changes	
Device FW 6.1.5	Firmware changes to current production VIA, Pathport, NFP (Network Fade Processor) and Vignette Clock to support new Device Type descriptions.

Bug Fixes	
N/A	None in this release.

Known Issues	
Limited RDM PID support	Some Manufacturer specific Properties are not shown
Offline RDM Devices	Even with background discovery turned on, RDM Devices that go off-line will still appear on-line (green dot) in the Device view.

Status	Security Domain	Type
Online	pathway	Choreo DIN-mount
Online	pathway	eLink
Online	pathway	NSB PoE Wall Station
