

FEATURES & SPECIFICATIONS

INTENDED USE — The XIB LED High Bay is designed and engineered to withstand medium-duty industrial environments. XIB is a fully sealed, wet location high bay in a linear form factor designed for warehousing, large indoor spaces, natatoriums, and gymnasiums as well as demanding environments such as manufacturing, service bays, packaging, ice rinks, under canopy, cold storage, and food service. The XIB is durable and powerful, but maintains an aesthetic appeal that makes it suitable for even retail and commercial applications. Ideal one-for-one replacement of conventional HID and fluorescent high bay systems. **Certain airborne contaminants can diminish the integrity of acrylic and/or polycarbonate.** [Click here for Acrylic-Polycarbonate Compatibility table for suitable uses.](#)

Certain airborne contaminants may adversely affect the functioning of LEDs and other electronic components, depending on various factors such as concentrations of the contaminants, ventilation, and temperature at the end-user location. [Click here for a list of substances that may not be suitable for interaction with LEDs and other electronic components.](#)

CONSTRUCTION — Rugged die-cast aluminum housing provides durability and corrosion resistance, IK ratings page 7. Single-piece housing provides rigidity and reduces potential for dust and water ingress. Silicone gaskets seal the electrical and optical compartments from dust and moisture, maintaining an IP65 rating with all internal components including integrated sensors. Wire guard attachment points are cast into luminaire housing.

Finish: Super durable TGIC thermoset powder coat finish provides 1,500 hours salt/fog rating.

Hardware provided is 410SS, mid-grade stainless steel which provides some corrosion resistance to chemicals, food, water and air.

OPTICS — Various lens options available including Acrylic or Glass for more stringent applications involving airborne contaminants or chemical solvents. Lens finishes available in Clear for maximum efficiency or Frosted to breakup line of sight to LEDs and reduce glare. Narrow, Medium, and Wide distributions available to meet horizontal and vertical illumination requirements. Narrow and Wide distributions molded into fresnel lens. The visually comfortable lens option is available for more aesthetic applications. Frosted Glass is recommended as standard. Injection-molded acrylic lenses provide high-impact resistance comparable to DR. Lenses resist breaking, yellowing, or becoming brittle over time. See chart on page 7 for IK ratings.

ELECTRICAL — Lumen Maintenance: L91 at 60,000 hours, L86 at 100,000 hours.

Full light output at 55°C. Luminaire utilizes a 90° case temperature driver for maximum life at high temperatures.

THD < 10% and PF > 90.

Standard Luminaire Surge Protection Level: Designed to withstand up to 10kV/5kA per ANSI C82.77-5-2015.

Available as 120-277V or 347-480V input.

0-10V dimming standard for a dimming range of 100% to 10%.

WIRELESS NETWORKING — nLight® AIR is the ideal solution for retrofit or new construction spaces where adding additional wiring can be labor intensive. nLight AIR available with or without an integral sensor. Integrated smart sensors or dimming and switching modules must be part of each luminaire in the nLight AIR network, which can be grouped to control multiple luminaires. The granularity of control with the digital PIR occupancy detection and daylight sensing makes this a great solution for any application, allowing maximization of energy savings. Integral sensors are also IP65 / Wet Location to maintain full rating of fixture. Additional side mount sensor options are available as accessories with mounting adapter kits (ordered separately).

INSTALLATION — Standard 3/4 inch NPS threaded hub centered on luminaire. Suitable for suspension by pendant (single monopoint), chain, or cable mounting with appropriate mounting accessories. Suitable for surface mount using compatible surface or yoke mount bracket (accessory ordered separately).

To maintain ambient listing, fixture should be mounted at a minimum plenum height of 12".

See accessories for available options.

LISTINGS — CSA certified to US and Canadian safety standards. U.S. Patent No. D921956. Wet Location listed. IP65 rated. Suitable for ambient temperatures from -40°F (-40°C) to 131°F (55°C) when suspended 12" from ceiling. NSF splash zone 2, meets FDA/USDA guidelines with acrylic lenses only.

DesignLights Consortium® (DLC) qualified product. Not all versions of this product may be DLC qualified. Please check the DLC Qualified Products List at www.designlights.org to confirm which versions are qualified.

GOVERNMENT PROCUREMENT — BAA — Product with the BAA option qualifies as a domestic end product under the Buy American Act as implemented in the FAR and DFARS. Product with the BAA option also qualifies as manufactured in the United States under DOT Buy America regulations. BABA — Build America Buy America: Product with the BAA option also qualifies as produced in the United States under the definitions of the Build America, Buy America Act. Please refer to www.acuitybrands.com/buy-american for additional information.

WARRANTY — 5-year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: www.acuitybrands.com/support/warranty/terms-and-conditions

Note: Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25 °C. Specifications subject to change without notice.

A+ Capable Luminaire

This item is an A+ capable luminaire, which has been designed and tested to provide consistent color appearance and out-of-the-box control compatibility with simple commissioning.

- All configurations of this luminaire meet the Acuity Brands' specification for chromatic consistency
- This luminaire is part of an A+ Certified solution for nLight® control networks marked by a **shaded background***

To learn more about A+, visit www.acuitybrands.com/aplus.

Cords Only*				
CNPWWL	6' White wet location cord without plug	NLTAIR2 RMSOD45	nLight (wireless) gen 2 high mount occupancy & daylight sensor ‡	
CNP4CWWL	6' White wet location cord without plug, 4 conductors (for use when unswitched hot is required for battery pack)	NLTAIR2 RIO	nLight (wireless) gen 2 dimming & switching module	
CNP5CDWWL	6' White wet location cord without plug, 5 conductors with dimming leads	*For 360° integral Low Mount sensors, replace "45" in nomenclature with "7". For high Aisle Mount sensors, replace "45" with "45A". Ex: NLTAIR2 RMSOD45A		
* For additional cord option see cord set table on page 3.				
				**For guidance on sensor functionality and sensor selection with emergency generator power, consult table on page 8.

NOTE: ‡ indicates option chosen has ordering restrictions. Please reference ordering restrictions chart, page 3. Options are sorted alphanumerically.

See Accessories and ordering restrictions on next page

‡ Option Value Ordering Restrictions	
Option value	Restriction
347	Not available with E15WMCP or ETS.
480	Not available with E15WMCP or ETS.
AO	Not available with dimming controls (SBGR D, SBGR ADC, SBG BTP, RMSOD, RIO).
E15WMCP	Orderable as MVOLT unless another option requires specific voltage. Not available with 347, 480, HVOLT, UPL, or ETS. If cord is required to have unswitched hot for battery pack then a four conductor cord must be ordered. Utilizes fixture back pack on L24, adds 2.89 inches to fixture depth, see dimensional line art for details.
IE18WCPHECW	Only available with L24 length. Orderable as MVOLT unless another option requires specific voltage. Not available with 347, 480, HVOLT, UPL, SBG BTP options, or ETS. Not available with NSG option. If cord is required to have unswitched hot for battery pack then a four conductor cord must be ordered.
GL	Does not meet FDA guidelines.
FRGL	Does not meet FDA guidelines.
HVOLT	Not available with E15WMCP or ETS.
ETS	Not available with 347, 480, HVOLT, E15WMCP or any control option that is for use with a generator.
L48	When pendant mounted, additional support cables required.
NLTAIR2 RMSOD45	Not available with NSG.
NSG	Not available with NLTAIR2 RMSOD45.
OCS	Must specify voltage. Will have dry location label.
OCS4C	Must specify voltage. For use when battery pack requires unswitched hot. Will have dry location label.
OCU_	Must specify voltage. Will have dry location label.
OUTEND	Available on 2' version only.
UPL	CCT, CRI matches fixture. Not available 347V, 480, or HVOLT. UPL utilizes dedicated driver. UPL is always on - sensors not tied to dedicated driver. Not available with Battery pack options. Not available with surface mounting.
WGX	Only available in white. Cold rolled 11 gauge steel (.120")
XIBDHK XXXX	Requires paint finish to be specified.
XIBSMB4	Required when surface mounting with a battery on the 2' unit.
XIBYMB	Not available with UPL.

Accessories: Order as separate catalog number.					
Mounting:		Wire guards:		Sensor adapter kits:	
IBAC120 M100	Aircraft cable 10' with hook (one pair)	WGXB	L24 DWHXD (for L48 length, order 2)	XIBDHK XXXX	Doghouse kit for use when field installing Compatible damp location sensors (LSXR, RLSXR, nPP16, rPP20, CMRB) ‡
IBAC240 M75	Aircraft cable 20' with hook (one pair)				
IBAC120SS	Aircraft cable 10' with hook, stainless steel (one pair)	WGXB AVCL	L24 DWHXD (for L48 length, order 2). Use when AVCL is specified for lens.	XIBBSK	Bracket sensor kit for use when installing compatible wet location sensor families (SBOR, rSBOR)
IBAC240SS	Aircraft cable 20' with hook, stainless steel (one pair)				
XIBSMB2	Surface mount bracket for use with L24 fixture				
XIBSMB4	Surface mount bracket for use with L48 fixture ‡				
XIBYMB	Yoke mount bracket for use with L24 fixture only ‡

EMERGENCY OPERATION SCENARIOS

	Standard Sensor or Control Device (commonly used with Battery Pack Option)	EM Solution (Used when switching single incoming hot to generator power)	ER Solution (Used when switching to generator power via a 2nd hot lead)
Emergency Lighting Strategy	*Luminaire-integral battery pack and emergency driver *Generator transfer device	*Diesel genset emergency backup supply *Slow transfer inverter (>30ms) emergency backup supply	*Fast Transfer (FT) inverter emergency backup supply *Uninterruptible Power System (UPS) emergency
Recommended Control Device Option	*Not specifically listed for emergency use. *Wired such that a separately listed emergency device provides emergency lighting power and/or control during loss of normal power scenarios.	*UL924 listed *Utilizes Power Interruption Detection to initiate lighting control override during loss of normal power scenarios. *Requires power interruption > 30 ms to luminaire during transfer to emergency backup supply.	*UL924 listed *Utilizes dedicated Normal Power sensing leads to initiate lighting control override during loss of normal power scenarios. *Requires connections to both emergency and normal power circuits.

	Function	Sequence of Operations	Standard Sensor or Control Device	EM Solution (Generator 1 Hot)	ER Solution (Generator 2 Hots)
Standalone Sensors (Individual control per fixture)	On/Off	Lights turn on when motion detected; Upon vacancy, Lights turn off after timeout.	SBGR6	-	SBGR6 ER
	Dimming	Lights turn on when motion is detected; Upon vacancy lights dim to low trim level after timeout.	SBGR6 D	-	SBGR6 D ER
	Photocell	Lights turn on when presence is detected unless ambient light level is above set point; Upon vacancy, the lights turn off after timeout; If ambient light levels in the space exceed the photocell set point, lights will turn off even during occupancy.	SBGR6 P	-	SBGR6 P ER
	Dimming + Photocell	Lights turn on when presence is detected unless ambient light level is above set point; Upon vacancy, the lights turn off after timeout; During occupancy, automatically raise and lower electric light level to maintain set point and turn off, depending on ambient light.	SBGR6 ADC	-	SBGR6 ADC ER
Note: For 360° integral Low Mount sensors, replace "6" in nomenclature with "10". Ex. SBGR10 P. EM sensors are KO-mounted. All others integral.					

Bluetooth Sensors (Configurable via mobile Bluetooth app)	On/Off	Lights turn on when motion detected; Upon vacancy, Lights turn off after timeout.	SBG6 OCC BTP	-	SBG6 OCC BTP ER
	High/Low (Off)	Lights turn on to high trim when presence is detected; Upon vacancy, the lights dim to low trim after timeout and turn off after "Dim To Off" Time Delay.	SBG6 HL BTP	-	SBG6 HL BTP ER
	Dimming + Photocell	Lights turn on when presence is detected unless ambient light level is above set point; Upon vacancy, the lights turn off after timeout; During occupancy, automatically raise and lower electric light level to maintain set point and turn off, depending on ambient light.	SBG6 ADC BTP	-	SBG6 ADC BTP ER
	Dimming + Photocell + High/Low (Off)	Lights turn on when presence is detected unless ambient light level is above set point; Upon vacancy, lights dim to low trim after timeout and remain at low trim until presence is detected; Automatically raise and lower electric light level to maintain set point during occupancy and during vacancy keeps lights at low trim if ambient light is not sufficient.	SBG6 ANL BTP	-	SBG6 ANL BTP ER
Note: For 360° integral Low Mount sensors, replace "6" in nomenclature with "10". Ex. SBG10 HL BTP.					

nLight AIR Wireless Sensors	Dimming + Photocell + Occupancy	Wirelessly programmable network sensor - On/Off control with dimming, occupancy detection, and daylight harvesting	NLTAIR2 RMS0D45	NLTAIR2 RSB0R6 EM	NLTAIR2 RMS0D45 ER
	Dimming	Wirelessly programmable On/Off control with dimming - no sensor	NLTAIR2 RIO	NLTAIR2 RPP20 D EM	NLTAIR2 RIO ER
Note: For 360° integral Low Mount sensors, replace "45" in nomenclature with "7". For high Aisle Mount sensors, replace "45" with "45A". Ex: NLTAIR2 RSB0R6 EM sensors/controls are KO-mounted. All others integral. RPP20 D EM de-rates fixture to Damp Location."					

***All ER solutions include standard sensor or control device with a factory-installed Iota ETS##-DR (UL924 bypass device).**

How to Estimate Delivered Lumens in Emergency Mode

Use the formula below to estimate the delivered lumens in emergency mode

Delivered Lumens = 1.25 x P x LPW

P = Output power of emergency driver. P = 15W for PS1555MCP

LPW = Lumen per watt rating of the luminaire. This information is available on the ABL luminaire spec sheet.

The LPW rating is also available at [Designlight Consortium](#).

COVERAGE PATTERNS

6

High Bay 360° Lens

- Best choice for 15 to 45 ft (4.57 to 13.72 m) mounting heights
- 15 to 20 ft (4.57 to 6.10 m) radial coverage overlaps area lit by a typical high bay fixture
- Excellent detection of large motion (e.g., walking) up to a 35 ft (10.76 m) mounting height
- Excellent detection of extra large motion (e.g., forklifts) up to a 45 ft (13.72 m) mounting height

LOW VIEW

HIGH VIEW

7

Mini-Low Bay 360° Lens

- Recommended for walking motion detection from mounting heights between 8 ft (2.44 m) and 20 ft (6.10 m)
- Initial detection of walking motion along sensor axes at distances of 2x the mounting height up to 15 ft (4.57 m) and 1.75x up to 20 ft (6.10 m)
- Provides 12 ft (3.66 m) radial detection of small motion when mounted at 9 ft (2.74 m)
- Initial detection will occur earlier when walking across sensor's field of view than walking directly at sensor

SIDE VIEW

TOP VIEW

45 - HIGH MOUNT 360°

- Optimized full coverage pattern for 10 – 40 ft. (3.1 – 12 m)
- Reliable detection of large motion (e.g. pedestrian walking traffic) up to 30 ft. (9.1 m) mounting height
- Reliable detection of extra-large motion (e.g. forklift traffic) up to 40 ft. (12 m) mounting height
- Stow-able rotating lens shield can be utilized to mask areas in which detection is not desired

SIDE VIEW

TOP VIEW

45A - HIGH MOUNT AISLEWAY

- Optimized bi directional coverage pattern for aiseways with 10 – 40 ft. (3.1 – 12 m) mounting heights
- 1.5x's mounting height equals approximate detection range
- Reliable detection of large motion (e.g. pedestrian walking traffic) up to 30 ft. (9.1 m) mounting height
- Reliable detection of extra-large motion (e.g. forklift traffic) up to 40 ft. (12 m) mounting height
- Stow-able rotating lens shield can be utilized to mask areas in which detection is not desired
