

LBK™

Light Bar Kit

High-Quality Illumination at an Exceptional Value

LBK provides a cost-effective LED option for retrofit in nearly any fluorescent fixture with T8, T12 or T5/T5HO lamps. Light Bar Kits replace tubes in recessed troffers and wraparounds without the need to remove the housing from the ceiling. This simple LED retrofit solution provides the reliability, thermal performance, and longevity expected of integrated LED systems without added renovation labor and waste.

Key Features:

- **Universal Design** - installs in nearly any fixture currently using 2', 3', or 4' fluorescent tubes
- **Reliable** - eliminates use of existing lampholders and confusing wiring to offer greater reliability
- **High Performance** - LEDs deliver greater than 150 LPW for lower input watts and more light
- **Longevity** - higher lumen maintenance with output exceeding L80 at 60,000 hours
- **Meets Your Needs** - higher quality light with >83 CRI and choice of 3500K, 4000K, or 5000K color temperatures

The Simplest Way to Go Green

Upgrade aging fluorescent fixtures to cost-effective, integrated LED lighting with a simple, reliable kit from Lithonia Lighting®, the company you trust. Get the benefits of a cooler running, longer-lasting integrated LED solution and avoid the pitfalls of tube replacements.

Quick installation minimizes 'ladder time' and disruption

High efficiency LEDs cut energy cost by up to 75% and eliminate tube replacement

Qualify for better rebates than T-LED tubes (check local program guidelines)

Customers can capitalize the cost of LBK for tax purposes as a permanent installation

Cooler operation maintains lumens and system life far longer than tubes

Lensed troffer with LBK installed

Wraparound with LBK installed
