

# Peerless® Renna™

Everyone deserves great lighting.

Peerless® Renna™ is a rectilinear profile luminaire that delivers what matters most to you – visual comfort, more control, sleek design, easy installation and premium quality in a cost-effective solution.

And now offering even more design options than before, with over fifteen transitions and on-site configurability with updates to Modulus™ Technology.

## Understanding Modulus Technology

Modulus is a low voltage distributed power and control system for providing digital control and networked technologies for LED luminaires.

**Easier Installation** – Modulus technology simplifies installation with a single class 2 power drop (including communication) for up to 32 feet of luminaires, reducing design complexity and design labor.

**Greater Flexibility** – Ability to easily add layers of control, configure and commission with a remote device, and change in the future without adding wires.

**Simplified Emergency Lighting Solutions** – Modulus complies with UL 924 for emergency lighting of a “directly controlled” luminaire system. This greatly simplifies design and installation of emergency linear sections without additional wiring and enables an entire grouping of linear sections to deliver emergency lighting if desired.

**Peerless®**

### Design Freedom

**Small form factor** - 1 inch high by 4 inches wide

**Run lengths** - 2 foot, 4 foot and 8 foot

**Complete set** - recessed, pendant, ceiling and wall mount

**Light Source** - direct, indirect, indirect/direct and a patent pending asymmetric vertical wall wash

**End caps** - square, rounded, sculpted

**Finishes** - textured white, textured black, painted aluminum, and custom colors also available

**Transitions** - now more than 15 twists and turns available.....

### Application Versatility

**Suspended Linear** - Efficient, comfortable general illumination

**Ceiling Surface-Mounted** - Low-profile, direct illumination, engineered to align straight on any ceiling

**Wall-Mounted** - Minimal profile and multitude of transitions enable continuous wall mounting

**Vertical Wall Wash** - Unique vertical wall-wash optics uniformly light walls from top to bottom

Renna transitions allow for patterns in 3-dimensional space. Create unique combinations of surface, suspended and wall-mounted configurations in the same application!

Renna is a recipient of the  
**Lightfair® International 2019 Design Excellence Award**
