

Peerless® Renna™

Everyone deserves great lighting.

Peerless® understands light and its impact on people within our built environments. The result? Elegant, technology-driven luminaires that enhance the human experience.

Continuing the Peerless legacy, Peerless Renna™ is a rectilinear luminaire that delivers what matters most to you – visual comfort, more control, sleek design, easy installation and premium quality in a cost-effective solution.

Quality of light you've been waiting for

Great lighting delivers exceptional visual comfort and lighting distribution - and now, in a small form factor. At four inches wide by one inch high, Renna combines exceptional quality of light and a sleek, minimalist design, delivering the brilliant illumination and design freedom you've been waiting for.

And with its uniform spread of illuminance, Renna delivers glare-controlled downlighting and a concealed source of asymmetric wall wash.

Design versatility unlike ever before

With its elegant, minimalist form factor and configurable dimensions, Renna can blend into your architectural expression or create a focal point to establish visual hierarchy. Select from multiple features to complete the look you desire:

- Three transitions: Mini square, curve and L corner
- Three end cap options: Square, sculpted and rounded
- Three linear run sizes: 2 ft, 4 ft, 8 ft
- Three finishes: Textured black, textured white, painted aluminum, with custom finishes and paint colors also available

Unmatched granularity of control you've been waiting for

Great lighting gives you more control, allowing spaces to change as your needs change. Faster and easier installations with Renna save time, money and reduce your troubleshooting woes.

Modulus™ is a low voltage distributed power and control system for providing digital control and networked technologies for LED luminaires.

This innovation from Acuity Brands® unifies an eldoLED® driver, an IOTA® power pack for emergency back-up power and nLight® networked lighting controls in the head unit. Modulus also supports controls systems with open protocols.

Easier installation – Modulus simplifies installation with a single power drop for up to 32 feet of luminaires, reducing complications and labor costs when designing an electrical layout

More flexibility – Total system modularity enhances flexibility with an integrated controls bus that can function with up to 16 DC/DC drivers for individual luminaire segment control or drivers can be zoned together in up to 16 independent zones per run

Simplified emergency planning – Configure or supplement multiple independent emergency illuminated sections without having to add another power drop.

All you desire in a cost-effective solution

Renna delivers what matters most to you. Combining a small form factor, sleek design, exceptional quality of light and greater control, Renna is cost-effective – ideal for any lighting project.

Low total solution cost – Low fixture price and modular system construction reduces jobsite time

Design2Ship™ - Reliable 5-day shipping assures quick delivery of Renna for the most time-sensitive projects
