

# SLOTTI

*SLOT 1 Recessed Pattern and SLOT 1 Pendant Direct/Indirect in Silver finish with edge-view lens.*

Technology is evolving, changing the way we work and how we interact with our built environments. This creates more opportunities and more complex challenges to solve. Aesthetics, quality and tailored control of light are critical to delivering a comprehensive solution for your design. Technology is also enabling our lighting to be smarter, smaller and more dynamic, resulting in greater complexity.

Your aspiration? [A simple solution.](#)

# A SIMPLE LINE OF LIGHT

*SLOT 1 Recessed Pattern and SLOT 1 Pendant Direct/Indirect in custom color finish with 1-inch drop lens.*

Developed as an extension of our existing SLOT family, SLOT 1 is thoughtfully crafted linear lighting, inspiring specifiers to make their most creative visions a reality.

Your design is thoughtful. The lighting should be too.

Draw your vision with a clean, polished luminaire that empowers you with superior optical performance and more control compared to other linear lighting solutions - now in a small form factor.

Inspire elegance with clean visuals that complement any architectural design, making a design trend your own.

SLOT 1 is the next generation of linear lighting.

Available in Recessed, Pendant, Surface and Wall forms, SLOT 1 is a full family of linear lighting solutions. With its sleek, small form factor, SLOT 1 delivers the brilliant illumination of linear lighting twice its size, with exceptional visual comfort and color quality you've been waiting for – at 90 CRI.

All forms are available with flush lenses and in Black, Silver and White finish options.

Direct and Indirect forms are 1.5 inches by 2.325 inches. Direct/Indirect forms are 1.5 inches by 3.125 inches.

Direct distributions, including Batwing, Wall Graze and Wall Wash, provide 200-1000 lumens per foot.

Indirect distributions, including Batwing and Lambertian, provide 400-1200 lumens per foot.

#### RECESSED

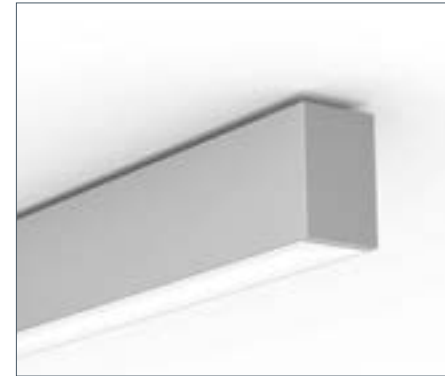

In its Recessed form, SLOT 1 provides Direct distribution.

A recessed lens option and deep cell baffle option conceal the light source and reduce glare. Baffles are available in Black and White.

#### PENDANT

In its Pendant form, SLOT 1 provides Direct, Indirect and Direct/Indirect distributions.

#### SURFACE

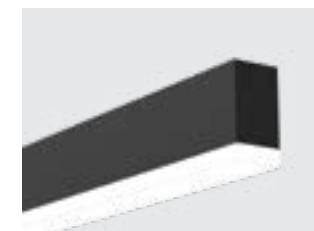

In its Surface form, SLOT 1 provides Direct distribution.

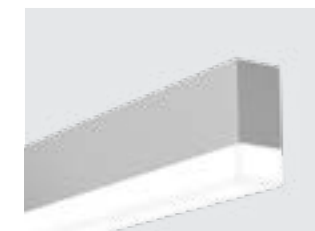

#### WALL

In its Wall form, SLOT 1 provides Direct, Indirect and Direct/Indirect distribution.

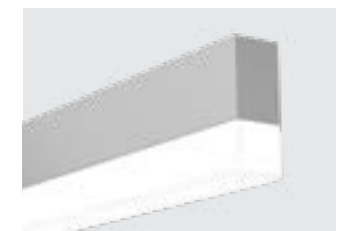

#### DIFFUSER OPTIONS AND SHIELDING FOR PENDANT, SURFACE AND WALL FORMS

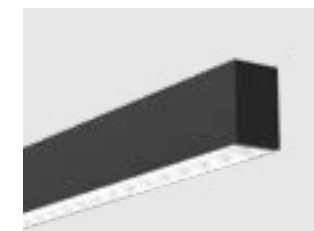

.5-inch Drop Lens

1-in. Drop Lens

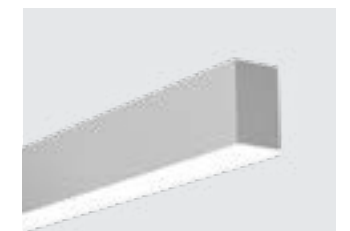

1.5-in. Drop Lens

# POWER AND CONTROL

Thoughtful lighting offers more control during the lighting experience, allowing lighting to change as your needs change.

Using the Modulus™ low voltage distributed power and control system for providing digital control and networked solutions, SLOT 1 delivers a greater granularity of control compared to other linear lighting solutions.

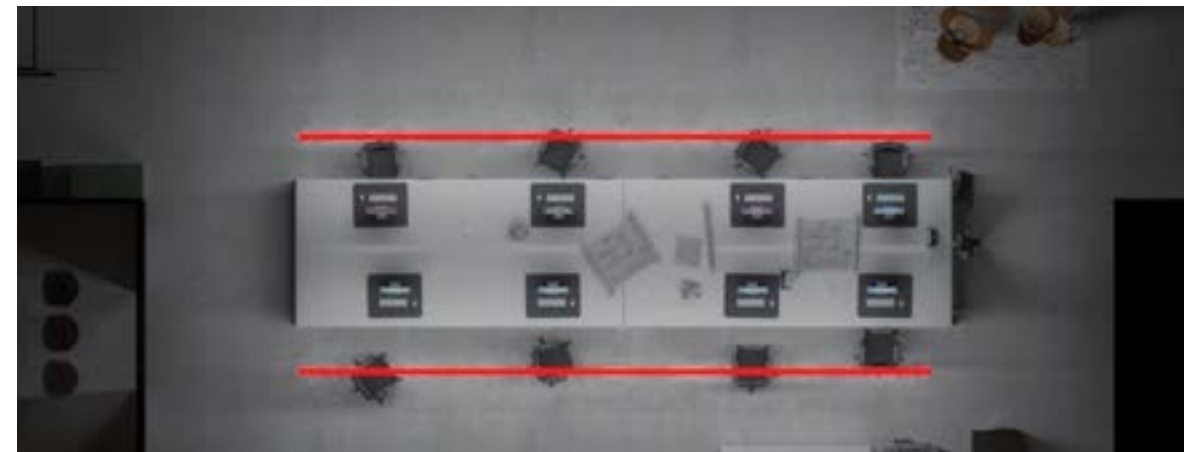

Modulus simplifies installation with one power drop for up to every 32 feet of luminaires, reducing complications and labor costs, and simplifying the design and installation of your linear lighting solution.

SLOT 1 Pendant Direct with flush lens.

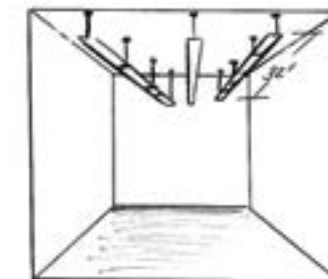

Traditional emergency layout that only lights the path of egress and exits from the building, which meet the minimum safety requirements.

Emergency layout with Modulus allows for a more balanced approach to emergency lighting, with the ability to specify all or multiple lit sections for a more uniform distribution.

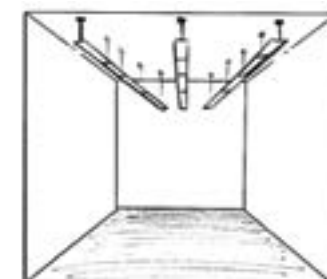

Delivering up to 16 channels of addressable control, including emergency lighting, Modulus enhances flexibility. Configure or supplement multiple independent emergency illuminated sections without adding another power drop.

TRADITIONAL

-Power drops every 8'  
-Highlight the drops  
-12 drops for 96'

MODULUS

-Power drop for up to every 32'  
-Highlight the drops  
-3 drops for 96'

Built upon a legacy of reliability and quality, SLOT 1 is elegant and configurable - and works as hard as you do. With its modular design and complete set of options, easily specify and integrate SLOT 1 into your next design vision.

## CREATE AN EXPERIENCE WITH ADVANCED DIMMING AND CONTROLS.

### **TUNABLE WHITE**

Tunable White enables occupants to adjust color temperatures to align with different activities, times of day and environments.

### **nLIGHT®**

Using only standard CAT-5e cables, an occupancy sensor, wall stations and digital LED luminaires, the nLight networked digital lighting system provides unmatched flexibility.
