

FEATURES & SPECIFICATIONS

INTENDED USE — Built on the classic C-Strip chassis, HRTC is an extremely efficient high output strip light. HRTC is ideal for new construction or retrofit and can be used in industrial, commercial, manufacturing, warehouse or display applications. **Certain airborne contaminants can diminish the integrity of acrylic and/or polycarbonate. Click here for Acrylic-Polycarbonate Compatibility table for suitable uses.**

CONSTRUCTION — Cold rolled steel housing and cover, gloss finish, is easy to install and maintain.

4.5" wide acrylic lens provides uniform light distribution without creating a glare.

OPTICS — L70>100k hrs.

Multiple lumen packages are available to match the application.

LEDs provide nominal 80CRI and 4000K or 5000K lumens.

ELECTRICAL — Utilizes high output LEDs integrated into a cool running LED board. Multivolt drivers and 0-10V analog dimming comes standard. Meets commercial standard ANSI surge protection of 2.5kV at 0.75kA.

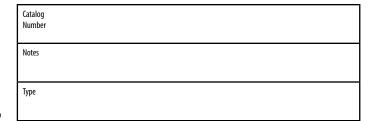

INSTALLATION — Tool-less channel cover for easy installation. Fixture may be surface mounted or suspended using the included Y hanger with 36" chain.

LISTINGS = UL listed to US and Canadian safety standards for use in damp locations. Refer to ambient temperature rating table for surface and suspended mounting listing.

Please check the DLC Qualified Products List at www.designlights.org to confirm which versions are qualified.
