

Lighting Controls Post Startup Services

Take Control of Your Building

The project is complete, but the support does not stop. Discover all the new system has to offer with the expertise of an Acuity Brands qualified field service engineer. Support will be provided to facility system users to take full advantage of the building's lighting system.

Services Offered

Optimization:

- Make programming changes to meet changing building needs
- Functionality checks including
 - Sensor Settings
 - Firmware/Software Updates
 - Lighting scene adjustments
 - Plus many more!

Troubleshooting:

- System corrections
- Assistance with replacement parts
- Recommendations for optimum performance and energy savings

Training:

- Provide training to onsite personnel to operate and maintain the system
- Focus on programming and troubleshooting
