

BLT with Care222® Technology

Our most popular lay-in for commercial spaces now available with a cutting-edge disinfection solution.

What goes best with superior lighting?
Peace of Mind.

What is Care222®?

An innovative UV disinfection* technology that reduces harmful pathogens within a space, while meeting safety guidelines for human occupants when used within the correct parameters.

Key Features of BLT with Care222®

- **Options to meet the needs of your space** – offered in 2x2 and 2x4 sizes, both available with single and dual module options to provide appropriate coverage for your space.
- **Consistency in your space** – the BL family is our most comprehensive line, allowing you to add this new fixture in your space while maintaining a consistent overall look and feel.
- **Configurability like no other** – wired and wireless controls through our nLight® platform, often occupancy sensing, daylight harvesting and much more.

Control harmful pathogens with single or dual module BLT lay-ins

High ceilings? Low ceilings? Either way our single or dual module BLT lay-ins can provide the right level of coverage for your space.

Single Module

Dual Module

Make It A Perfect Fit For Your Project

| Sizes | Effective Mounting Heights | Lumen Range | Color Temps | Controls |
|----------------|----------------------------|-------------|-------------|------------------------|
| 2'x2' 2'x4' | 9ft – 12ft | 2000 – 6000 | 3000-5000 | nLight® nLight® Air |
