To reduce the risk of death, personal injury or property damage from fire, electric shock, falling parts, cuts/abrasions, and other hazards please read all warnings and instructions included with and on the fixture box and all fixture labels.

Before installing, servicing, or performing routine maintenance upon this equipment, follow these general precautions.

Installation and service of luminaires should be performed by a qualified licensed electrician.

Maintenance of the luminaires should be performed by person(s) familiar with the luminaires’ construction and operation and any hazards involved. Regular fixture maintenance programs are recommended.

It will occasionally be necessary to clean the outside of the refractor/lens. Frequency of cleaning will depend on ambient dirt level and minimum light output which is acceptable to user. Refractor/lens should be washed in a solution of warm water and any mild, non-abrasive household detergent, rinsed with clean water and wiped dry. Should optical assembly become dirty on the inside, wipe refractor/lens and clean in above manner, replacing damaged gaskets as necessary.

DO NOT INSTALL DAMAGED PRODUCT! This luminaire has been properly packed so that no parts should have been damaged during transit. Inspect to confirm. Any part damaged or broken during or after assembly should be replaced.

Recycle: For information on how to recycle LED electronic products, please visit www.epa.gov.

These instructions do not purport to cover all details or variations in equipment nor to provide every possible contingency to meet in connection with installation, operation, or maintenance. Should further information be desired or should particular problems arise which are not covered sufficiently for the purchaser’s or owner’s purposes, this matter should be referred to Acuity Brands Lighting, Inc.

---

**WARNING**

**RISK OF ELECTRIC SHOCK**

- Disconnect or turn off power before installation or servicing.
- Verify that supply voltage is correct by comparing it with the luminaire label information.
- Make all electrical and grounded connections in accordance with the National Electrical Code (NEC) and any applicable local code requirements.
- All wiring connections should be capped with UL approved recognized wire connectors.

**WARNING**

**RISK OF BURN**

- Allow lamp/fixture to cool before handling. Do not touch enclosure or light source.
- Do not exceed maximum wattage marked on luminaire label.
- Follow all manufacturer’s warnings, recommendations and restrictions for: driver type, burning position, mounting locations/methods, replacement and recycling.

**CAUTION**

**RISK OF INJURY**

- Wear gloves and safety glasses at all times when removing luminaire from carton, installing, servicing or performing maintenance.
- Avoid direct eye exposure to the light source while it is on.

**CAUTION**

**RISK OF FIRE**

- Keep combustible and other materials that can burn, away from lamp/lens.
- Do not operate in close proximity to persons, combustible materials or substances affected by heat or drying.
IMPORTANT SAFETY INSTRUCTIONS

CAUTION: RISK OF PRODUCT DAMAGE

✓ Never connect components under load.
✓ Do not mount or support these fixtures in a manner that can cut the outer jacket or damage wire insulation.
✓ Unless individual product specifications deem otherwise: Never connect an LED product directly to dimmer packs, occupancy sensors, timing devices, or other related control devices. LED fixtures must be powered directly off a switched circuit.
✓ Unless individual product specifications deem otherwise: Do not restrict fixture ventilation. Allow for some volume of airspace around fixture. Avoid covering LED fixtures with insulation, foam, or other material that will prevent convection or conduction cooling.
✓ Unless individual product specifications deem otherwise: Do not exceed fixtures maximum ambient temperature.
✓ Only use fixture in its intended location.
✓ LED products are Polarity Sensitive. Ensure proper Polarity before installation.
✓ Electrostatic Discharge (ESD): ESD can damage LED fixtures. Personal grounding equipment must be worn during all installation or servicing of the unit.
✓ Do not touch individual electrical components as this can cause ESD, shorten lamp life, or alter performance.
✓ Some components inside the fixture may not be serviceable. In the unlikely event your unit may require service, stop using the unit immediately and contact an ABL representative for assistance.
✓ Always read the fixture’s complete installation instructions prior to installation for any additional fixture specific warnings.

Please see product specific installation instructions for additional warnings or any applicable FCC or other regulatory statements.

Failure to follow any of these instructions could void product warranties. For a complete listing of product Terms and Conditions, please visit www.acuitybrands.com.

1. INTRODUCTION: THIS RETROFIT INSTRUCTION APPLIES TO ARE AND JFE LEGACY LUMINAIRES

1.1 Product Description.

This post top luminaire LED retrofit kit is designed with LED’s which have long life and minimize maintenance.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

1.2 Alternate Information Sources.

OPTICS ORIENTATION NOTES

Some of the fixtures in this series are equipped with optical components that produce distributions of light that are not symmetric and are intended to be aimed by orienting the prismatic refractor a specific direction. There is a molded-in “Street Side” marking on the glass or plastic refractor, align this with the Street Side marking on the LED casting and point this side toward the street. See figure 6 for aiming details.
2.2 Luminaire LED Retrofit.

2.2.1 This retrofit kit is provided in three main parts: the electrical tray, upper heat sink casting assembly and the reflector assembly.

2.2.2 Ensure that power is off to the pole and light fixture. It is recommended that the fixture to be retrofitted be removed from its current mounting and taken to a place where the new parts can be laid out, and where the existing fixture can be disassembled easily. Place the fixture on a clean, dry, flat surface.

2.2.3 Wipe off exterior dirt and debris from the surfaces using a soft, clean cloth.

CAUTION
DO NOT USE ABRASIVE CLEANSERS ON OPTICAL SURFACES. THEIR USE MAY RESULT IN THE LOSS OF OPTICAL EFFICIENCY.

2.2.4 Unlatch the top cover assembly. Remove the cotter pins and hinge pins from the top cover hinge section. (Save these parts; they will be reused). Place the top cover assembly to the side.

2.2.5 Remove the refractor (glass or plastic optic); it will be reused later so place it in an area where it won’t be damaged. Remove the ballast plate assembly; discard this assembly in a safe manner.

2.2.6 Next, remove the existing reflector, reflector springs and screws from the cover portion of the luminaire & discard these parts.

2.2.7 Wire incoming leads to electrical tray accordingly. Connect incoming ground wire to ground wire attached to inside of wiring chamber and to the green ground wire of the electrical tray. Carefully place connections in wiring chamber for future access. See Figure 2.

2.2.8 Replace electrical tray on keyway slots, twist clockwise and tighten screws.

2.2.9 Install the new reflector on top of the center driver bracket using the provided screws. Align the cutout of the reflector towards the cable assembly bracket.
2.2.10 Fig. 3 shows how the main harness from the electrical tray is routed along the cable assembly bracket. The top of the white overmold should line up with the top of the bracket. Wire tie the harness to the bracket at the slots.

Figure 4

2.2.11 Remove the plastic protective film from the reflector. Keep oil, grease, dirt, or other contaminants from touching this surface.

2.2.12 Replace the glass or plastic optic. Orient "street side" on optic with street side of luminaire. See Figure 4.

2.2.13 Make the final harness connection to the heat sink LED assembly and place the LED heat sink assembly into the luminaire on top of the glass or plastic optic as shown in Figure 4.

**NOTE:** There is an orientation to this heat sink assembly. Ensure the raised boss on the heat sink assembly is pointing to the "street side" of the luminaire. See Figure 4.

Figure 5

2.2.14 Remove the existing latch (shown in Fig 1.) and discard this latch and its screws. Replace using the parts included. Follow Figure 5 for an example of the assembly. Tighten the screws to lower latch to 15-20 in-lbs.

Figure 6

2.2.15 Close the cover and tighten main ¼-20 screw until the top and bottom latch components meet.

2.2.16 Replace the fixture on its mounting, level the fixture, and alternately tighten the set screws to 60 in-lbs.

2.2.17 Energize the unit and check for proper operation.
3. MAINTENANCE

3.1 Cleaning

3.1.1 Make sure the unit is de-energized.
3.1.2 Wipe off exterior dirt and debris using a soft, clean cloth.

CAUTION
DO NOT USE ABRASIVE CLEANSERS ON OPTICAL SURFACES. THEIR USE MAY RESULT IN THE LOSS OF OPTICAL EFFICIENCY.

3.2 Electrical Component Replacement

3.2.1 To replace photocontrol. (If provided) Make sure the unit is de-energized. Twist counterclockwise and remove. Replace with equivalent photocontrol.

3.2.2 For all other electrical parts- Make sure the unit is de-energized. Open housing by unscrewing and removing latch and latch screw (Fig 1). Disconnect main power quick disconnect and photo control disconnect (if applicable) and remove the reflector by loosening (2) screws. (See Fig 2).

3.2.3 To replace LED driver. Make sure the unit is de-energized. Loosen and remove electrical tray to access parts. Disconnect input and output via quick disconnects and remove (2) mounting screws. Replace with Holophane approved driver. See Figure 7. If no other components are to be replaced go to Section 3.2.6.

3.2.4 Replacement of surge protector. Disconnect quick disconnect plug coming from terminal and quick disconnect going to optical compartment. Remove SPD SCREW connecting the surge protector to the plate; retain screws for re-installation.

3.2.5 For standard surge units, remove the screw from mounting bracket and slide surge protector through opening in mounting bracket. Replace with Holophane approved device. See Figure 4.

3.2.6 Bundle and secure the wiring in a manner like the way it was originally secured to avoid pinching of wires when re-installing the module into the housing.

3.2.7 Replace electrical tray on keyway slots, twist clockwise and tighten screws.

3.2.8 Replace reflector (See Fig 3) and reconnect wiring harness(s), LED cover, latch and latch screw.

3.2.9 Energize the unit and check for proper operation.

4. LIMITED WARRANTY AND LIMITATION OF LIABILITY

The Holophane limited warranty and limitation of liability is available on our web site www.Holophane.com.

It is also available from your local Holophane sales representative.
