

Smart Wafer Downlight Series

The perfect way to get connected with your Smart Home Lighting System.

Works with
SmartThings

JUNO[®]

All of the benefits of the ultra-thin recessed Wafer and so much more!

Canless Design

Easy retrofit, remodel or new construction installation from below the ceiling, no housing required.

State of the Art LED Lighting

Delivers up to 1000 lumens and dims down to 1% (Perfect for use as a nightlight).

Edge-lit LED technology

Light guided plate and polycarbonate lens provides even illumination throughout the space.

Ultimate Flexibility

For SmartThings mobile app pairing, no hub required

Enable voice control

Pair with Alexa or Google Home directly* or via a SmartThings Hub

Tunable White

Change the color temperature from 2700K to 5000K from the app

Personalization

Control individually or create zones using a simple app

Control from anywhere

When connected to a smart hub, control or monitor lighting from anywhere with your app

*Directly with Echo Plus, Echo Show, Echo Studio and Google Home

Smart Wafer LED Downlight Trim Styles

With an IC rated design, the Smart Wafer is available in 3 trim styles and 2 aperture sizes in either a flat smooth, regressed baffle, or adjustable to enhance the aesthetics of any application. For enhanced glare control, the Regressed Baffle provides a ½” regression which reduces glare and shadows at the ceiling plane. The crisp baffle lines soften the light output delivering comfortable light in the space. The adjustable provides 110° directional beam, 20° tilt, and 180° rotation for accent lighting.
