

RetroBasics™ Smart LED Trim Kit

RetroBasics™ Smart LED Trim Kits provide the most economical solution for efficiently lighting a space using LED technology with virtually zero maintenance. Available in 4" and 5/6" sizes along with Smart capabilities and color changing functionality, the RetroBasics downlight family covers an array of applications, providing a solution for every room of a home.

Features and Benefits:

- **Smart Home Lighting Solution** – control lighting via voice control or App from virtually anywhere.
- **Easy Set-up with or without a hub** – via Bluetooth or Zigbee to work with smart home platforms Amazon® Alexa, Google Home, and Samsung® SmartThings.
- **Smart Control** – customize lighting from on/off, fine-tuning the color temperatures (2700K to 5000K) or RGBW for full color spectrum options, dimming to 1% (perfect for use as a nightlight), and grouping to control an entire lighting application at once.
- **Personalization** – control individually or create zones using a simple app
- **Easy Installation and Serviceability** – all-in-one design where electronics are integrated into trim replaces the existing lamp and trim
- **Wet Location and IC Rated** – perfect for showers, bathrooms, and outdoor soffits and for use with housings installed in direct contact with insulation. *Pairs perfectly with Juno® Quick Connect New Construction & Remodel LED Housings.
- **Adjustable Gimbal Design** – Provides 35° vertical aiming. Perfect for accent lighting and wall washing in any room.

Juno® RetroBasics™ Smart LED Trim Kits
