

# Smart Speaker Downlight with RGBW

## Recessed Downlight with Integrated Bluetooth™ Enabled Speaker

The J6SLC LED Smart Speaker Downlight with RGBW color changing functionality is the perfect way to get connected with a smart home lighting solution. Using Bluetooth® or Zigbee, the J6SLC can be controlled either via voice command or via app. Compatible apps and smart home hubs include: Amazon® Alexa, Samsung® SmartThings, and Google Home platforms. Once installed and paired, the J6SLC provides endless customization options for easy lighting control. Customization options include: changing lighting from on/off, setting desired color temperatures from soft white, 2700K to daylight, 5000K or choosing from a full color spectrum of RGB color options to set the mood. Plus, dimmable down to 1% (perfect for use as a nightlight). The J6SLC doesn't stop with lighting though, for more entertainment, we have included an integrated Bluetooth®- enabled speaker inside the downlight that allows music to stream and play from any app, Spotify, Pandora, etc.

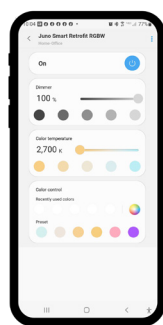

### Features:

- **Smart Home Lighting Solutions** Control lighting via voice control or App from virtually anywhere.
- **Easy Set-up with or without a Hub** Via Bluetooth or Zigbee to work with smart home platforms Amazon® Alexa, Google Home, and Samsung® SmartThings. When setup with a hub, control/monitor lighting from anywhere with your app.
- **Smart Control** Customize lighting from on/off, fine-tuning the color temperatures (2700K to 5000K) or RGB for full color spectrum options, dimming to set the mood, and grouping to control and entire lighting application at once.
- **Personalization** Control individually or create zones using a simple App. Wirelessly pair up to 12 speaker downlights.
- **Easy Installation and Serviceability** All-in-one design where electronics are integrated into trim replaces the existing lamp and trim.
- **Audio Streaming** Control integrated speaker using Bluetooth™ enabled devices to add music to any environment. Control speaker audio via standard wall switch or with smart home app. Apps include Samsung® SmartThings, Amazon® Alexa and Google Home Platforms.
- **Wet Location and IC Rated** Perfect for showers, bathrooms, and outdoor patios, eaves, or soffits and for use with housing installed in direct contact with insulation.

**Note:** Pairs perfectly with Juno Quick New Construction & Remodel LED Housing.
