## FEATURES & SPECIFICATIONS

**INTENDED USE** — Lithonia SIX has a **nominal 6" wide housing with a 4" wide aperture, available in 2FT, 4FT, and 8FT discrete lengths**. LSIX provides performance, configurability, value and style. LSIX is the ideal choice for the majority of commercial applications where it aligns with modern design trends, easier to install, and is environmentally responsible. North American manufacturing allows for short lead-times. The slim profile of the luminaire, coupled with energy-saving LED technology make LSIX an ideal choice for renovation or new construction. The LSIX recessed linear lay-in offers a high-quality, cost-effective LED lighting solution for schools, offices, retail, healthcare facilities and other commercial spaces.

LSIX Tunable White is perfect in educational and healthcare settings as it allows the light color temperature to be adjusted to the optimal light level for the intended mood. The LSIX Tunable White fixture utilizes our Acuity **nLight Controls system** by way of the nTUNE (Hyperlink "nTune") device, which requires **power over ethernet (PoE)**. Because of this, the LSIX Tunable White fixture **requires an nLight PoE device, such as the nPS80 EZ or the nPP16D EFP** in order for the nTUNE device to be functional.

**CONSTRUCTION** — Built on a direct lit platform, the Lithonia SIX was designed for durability, depth and elegance. LSIX has a **nominal 6" wide housing with a 4" wide aperture**, available in 2FT, 4FT and 8FT discrete lengths. The beveled frame option features a **0.6" regress** to provide physical depth. LSIX has a low-profile design to provide increased installation flexibility in restricted plenum spaces. The **.66mm thick back-plate** includes integral T-bar clips for **installation into 9/16" and 15/16" T-grid ceilings** with no additional components. In a 9/16" T-grid ceiling, the **bezel frame option allows the bottom of the luminaire to sit flush with tegular ceiling tiles**. Antimicrobial paint finish available.

**Integrated Sensor (nLight® Wired Networking)**: This sensor is nLight-enabled, meaning it has the ability to communicate over an nLight network. When wired, using CAT-5 cabling, with other nLight-enabled sensors, power packs, or WallPods, an nLight control zone is created. Once linked to a Gateway, directly or via a Bridge, the zone becomes capable of remote status monitoring and control via SensorView software.

**Mainstream Dynamic Tunable White with nTune Technology**: Tunable white nTune™ is an all digital light color temperature control within an nLight enabled luminaire. This brings tunable white lighting control into the mainstream with repeatable, consistent results in an economical luminaire form and system already familiar to schools. Designers and facility operators are granted the freedom to tie scenes to specific activities or to complement colors or materials within a visual environment. nTune™ allows color temperature settings through the Productivity Range of 3000K-5000K and the Rhythm Range of 2700K to 6500K. Refer to the Programming User's Guide for instructions on customizing to your application with SensorView.

**INSTALLATION** — With a depth of only 2.1", LSIX makes for an easy installation, especially in restrictive plenum applications. LSIX fits into standard 15/16" and narrow 9/16" T-grid ceiling systems. Suitable for damp location.

**ELECTRICAL** — Long-life LED's, coupled with high-efficiency drivers provide superior quality of light and an extended service life. 80% LED lumen maintenance at 60,000 hours (L80/60,000). 0-10 volt dimming driver, dims to 1%.

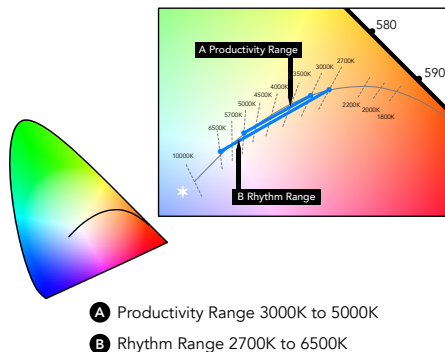

**LISTINGS** — CSA certified to meet US and Canadian standards. Damp location listed. IC rated. **IP5X rated. Tested in accordance with ISO 14644-14; suitable for ISO Class 5-9 positive and negative pressure clean rooms. Rated for NSF/ANSI Standard 2 – Light Fixture for Splash Zone and Non Food Zone.**

**WARRANTY** — 5-year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: [www.acuitybrands.com/support/warranty/terms-and-conditions](http://www.acuitybrands.com/support/warranty/terms-and-conditions)

**Note:** Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25 °C. Specifications subject to change without notice

### Tunable White GPHD

- **Gamut:** One dimensional Warm-Cool
- **Path:** Direct 3000K to 5000K (Productivity Range) or 2700K to 6500K (Rhythm Range)
- **Handle:** Two Natural Language Handles: Intensity and CCT
- **Data:** nLight with nTune technology for both handles of control

#### Specifications

<b>Length:</b>	23.82 (60.5), 47.80 (121.41), 95.81 (243.36)
<b>Width:</b>	5.81 (14.76)
<b>Depth:</b>	3.64 (9.25)
<b>Weight:</b>	2FT: 4lbs    4FT: 6.25 lbs    8FT: 11.7lbs

All dimensions are inches (centimeters)

## Embed nLight controls today. Prepare for tomorrow.

### Now

- User-friendly install
- Enhanced energy savings
- Code compliance

### Tomorrow

- Scalability
- Space configuration
- Future-ready

## Capable Luminaire

This item is an A+ capable luminaire, which has been designed and tested to provide consistent color appearance and out-of-the-box control compatibility with simple commissioning.

- All configurations of this luminaire meet the Acuity Brands' specification for chromatic consistency
- This luminaire is part of an A+ Certified solution for nLight® control networks when ordered with drivers marked by a shaded background\*
- This luminaire is part of an A+ Certified solution for nLight control networks, providing advanced control functionality at the luminaire level, when selection includes driver and control options marked by a shaded background\*

To learn more about A+, visit [www.acuitybrands.com/aplus](http://www.acuitybrands.com/aplus).

DLTLATC J80	Earthquake Clip, 20 sets of 4

Notes:

1. Cannot be installed with fixture with integrated NLTAIR2 Options.

Emergency Battery Estimated Lumens
Use the formula below to estimate the delivered lumens in emergency mode <b>Estimated Lumens = 1.25 x P x LPW</b> <b>P</b> = Output power of emergency driver (10W for E10WCP option.) <b>LPW</b> = Lumen per watt rating of the luminaire.

UL924 Sequence of Operation
The below information applies to all nLight AIR devices with an EM option.
<ul style="list-style-type: none"> <li>• EM devices will remain at their high-end trim and ignore wireless lighting control commands, unless a normal-power-sensed (NPS) broadcast is received at least every 8 seconds.</li> <li>• Using the CLAIRITY+ mobile app, EM devices must be associated with a group that includes a normal power sensing device to receive NPS broadcasts.</li> <li>• Only non-emergency rPP20, rLSXR, rSBOR, rSDGR, and nLight AIR luminaires with version 3.4 or later firmware can provide normal power sensing for EM devices. See specification sheets for control devices and luminaires for more information on options that support normal power sensing.</li> </ul>

## Emergency Battery Pack Options - Field Installable

Battery Model Number	Wattage	Runtime (Minutes)	Lumen Output* @ 120 Lumens/Watt	Other
ILB CP07 2H A	7W	120	840	Storm Shelter / 2 Hour Runtime
ILB CP10 A	10W	90	1200	
ILBLP CP10 HE SD A	10W	90	1200	Title 20, Self Diagnostic
ILBLP CP15 HE SD A	15W	90	1800	Title 20, Self Diagnostic
ILB CP20 HE A	20W	90	2400	Title 20
ILB CP20 HE SD A	20W	90	2400	Title 20, Self Diagnostic

All the above are UL Listed products that are certified for field install external/remote to the fixture.

\*Minimum delivered lumen output to assist in product selection for increased fixture mounting height.

The CP10 delivered emergency illumination outperforms legacy 1400 lumen fluorescent emergency ballast.

Please contact us at [techsupport@iotaengineering.com](mailto:techsupport@iotaengineering.com) for any Emergency Battery related questions.

### Bezel Frame Integrated into 9/16" Tegalur Ceiling for Minimized Grid Appearance

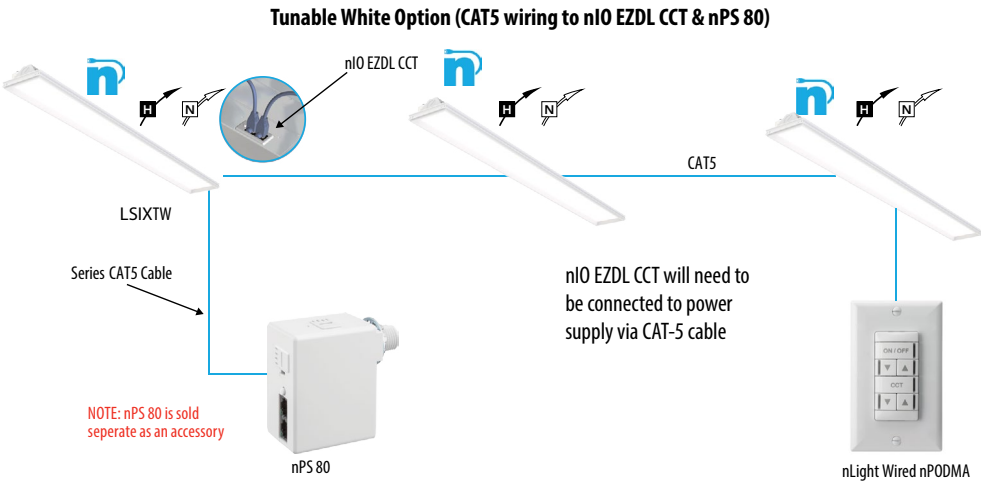

### Bezel Frame Integrated into 15/16" Ceiling

nLight Platform

nLight Wired Networking

Simple as 1, 2, 3

1. Install the nLight® Wired fixtures with embedded control
2. Install the nLight Wired wall switch
3. Connect the fixtures using standard CAT5e cables and the devices will automatically discover each other and work (plug and play)

nLight embedded fixtures offer:	Customers get:
Manual Dimming	Convenience and visual comfort for occupants
Motion Sensing and/or Daylight Harvesting	Energy savings and code compliance
Fixture or Group Level Control	Ability to configure lighting to the space requirements
Flexibility	Ease of fixture moves, adds and changes
Wireless Wall Switch (nLight AIR Only)	Ease and flexibility of placement
Astronomical and Time of Day Scheduling	Energy savings and building security
Scalable Solution	nLight controls to grow with your business
Future-Ready	nLight platform to set foundation for future upgrades and capabilities
