

### General Information

Item Number	*2743Y4 (58055) & *2743Y5 (58056)
Type	Constant Current
Output Power	200W (Max.)
Programming Tool	*274A17 (51645)
Software	<a href="#">Download</a>
Programmable Features	Output Current Soft start, Dim-to-Off Dimming Level LED thermal protection Constant lumen output End-of-life indicator Vaux (12/20/24V)

Find (NAED) as cross reference for new item number i.e. \*12345

### Environmental Specifications

Ambient Operating Temperature	-40°C to 55°C
Max. Case Temperature (Tc)	88°C*
Max. Storage Temp.	70°C
Max. Relative Humidity (%)	95% non-condensing
Transient Protection	ANSI C82.77-5-2015 6.0kV, 4kV EFT
IP Rating	IP66
UL Rating	UL Class P, Dry & Damp Type HL
UL File number	E320395
EMI Compliance	FCC Part 15 Class A
Sound Rating	Class A

\* - 5 year warranty applicable at 85°C

### Electrical Specifications

#### Input

Input Voltage (VAC)	120V-277V (+/- 10%)	
Frequency Range (Hz)	50 - 60 Hz (+/- 10%)	
	<b>120V</b>	<b>277V</b>
Input Current (A)	1.86	0.80
THD @ Full load	<20%	<20%
Power Factor @ Full load	>0.9	>0.9
Efficiency @ Full load	≥91.5%	≥93%
Inrush Current (Apk)	45.9@ 240μs	115.1@ 150μs

#### Output

Output Current (mA)	900 - 1400 mA (Default: 1050 mA)
Output Voltage (VDC)	75-180 VDC
Output Ripple Current	< 25%
Max. Output Power (W)	200W
LED Power-Up Time	< 1sec
Load Regulation	< 5%
Line Regulation	< 5%
Over Voltage Protection	Yes, non-latching
Over Load Protection	Power fold back @ 210W
Output Short-Circuit Protection	Yes, non-latching
Over Temperature Protection	Foldback to 60% at 100°C, Auto Recovery

#### Dimming

Dimming Control	0 - 10V (Isolated)** AstroDIM
Dimming Range	10-100%
Dimming Type	Analog
Source/Sink Current	0.8 mA
Dim-to-Off OFF/ON Threshold	0.91V/1.01V
Dim-to-Off Standby Power	< 1W

**CAUTION: Two power supplies if dimming is connected to non-class 2 circuits.**

\*\* - Class 2 or non-class 2 wiring allowed

#### Auxiliary Output (For AUX models only)

Output Voltage (Vdc)	12/20/24V (configurable)
Output Power (W)	2.4W Max
Voltage Regulation	+/- 10%

#### LED thermal protection (NTC)

NTC Value Active Range	≤25kΩ
Output level minimum	User defined

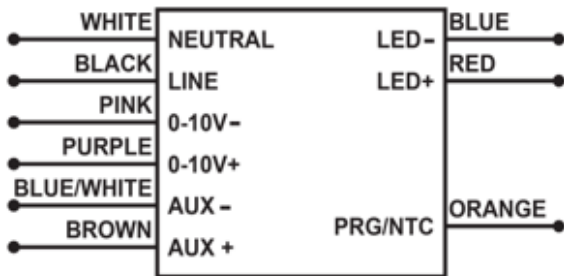

External NTC cannot leave the fixture.

The PRG/ NTC control circuit terminals or lead wires are not isolated.

The external NTC needs to be isolated or separated by live parts.

## Wiring Diagram

Wiring diagram for AUX output model

Wiring diagram for Non-AUX output models

**Note:** - Maximum suggested remote mounting distance is 16 feet.

- The Dimming input is isolated and will allow Class 2 or non-Class 2 wiring across Purple and Pink wires

## Ordering Guide

Item Number	Original Item Number	Ordering Description
*2743Y4	58055	OTi200W/UNV/1400C/2DIM+/P6
*2743Y5	58056	OTi200W/UNV/1400C/2DIM+/P6/AUX

## Key Application Notes

- Dim-to-off and Soft start are programmable (enable/disable) features. The default mode for both features is disabled for out-of-the-box products. If these features are required, they must be enabled in the programming software.

## Mechanical Diagram

## Mechanical Specifications

Length	9.46" (240.5mm)
Width	2.29" (58.3mm)
Height	1.5" (38.3mm)
Mounting Length	8.9" (226.3mm)
Mounting Slot Width	0.34" (8.7mm)

## LED Thermal Protection (NTC) Characteristic

The LED thermal protection feature of the OTi200W helps reduce the temperature of the LED module by reducing the output current in case of abnormal temperature conditions. To use this feature a third party NTC thermistor should be connected to the LED power supply as shown in the wiring diagram below.

In the end application, care must be taken to place the NTC thermistor close to the hottest spot on the LED module. If LED thermal protection is not required the NTC port on the LED power supply connector can be left open.

Vishay, EPCOS, Murata, Panasonic are some of the manufacturers of NTC thermistor. EPCOS part number for reference only **B57164K153J (15k $\Omega$  @ 25°C)**. Murata part number for reference only - **NCP03XH223J05RL (22k $\Omega$  @ 25°C)**.

To learn more about this feature, please refer to the Technical Guide for [LED Thermal Protection](#) (ECS304).

**Note:** Graphs for reference. The derating limits can be programmed using the OT Programmer.

---

## End-of-Life Indicator

The End-of-Life indicator feature helps the end user to receive a signal from the fixture indicating that it has reached its programmed life-time. After the LED driver reaches the programmed life-time, whenever it is turned ON, it stays at Dim level (10%) for 10 minutes and reaches its appropriate level.

---

## AstroDIM

AstroDIM is an autonomous five level (1 Power ON & 4 Dimming levels) dimming protocol. It provides multi-stage night-time power reduction based on an internal timer; there is no need for an external control infrastructure. The ECG is automatically aligned to the on and off times for the street lighting and provide a defined output for the particular period of time. Compared with conventional systems there are significant cost savings. AstroDIM is designed for dimming without any external control wiring. Therefore, AstroDIM helps to save energy, extend the life of the driver and the LED module and reduce light pollution, even if only a power line is available. In AstroDIM operation, the driver executes a preset dimming profile, which can be reconfigured via the OT Programming Tool. The autonomous dimming is regulated by an integrated timer (no real-time clock), which adjusts the dimming profile according to the previous night (operation from switch-on to switch-off).

---

## Constant Lumen Maintenance

The Constant Lumen Maintenance feature of the OTi200W helps to maintain the required lumen output of the fixture at a constant level throughout its lifetime. In general LED's lumen output will depreciate over time and in order to maintain sufficient light level towards the end of lifetime, the LED's are driven at high current initially and will result in more energy consumption. The constant lumen maintenance will give the flexibility to drive the LEDs at optimal driving current throughout its lifetime. This helps in energy savings, constant light output and enhanced reliability of the system.

**Note:** Step-by-step instructions are outlined in the OT Programmer User Manual embedded in the software.

---

## Lifetime vs TCase

---

## Inrush Characteristic

Vin (V)	Ipeak (A)	T(@ 10% of Ipeak)
120	45.9	240 μs
277	115.1	150 μs

Complies to NEMA 410 inrush current requirements

---

## Dimmer/Sensor Compatibility

Manufacturer	Part Number
Digital Lumens	EN-ILCM-1R10V-GB2-BK
	EN-ILCM-1R10V-GB2-BK/DR
	EN-ALC-1R10V-GB2-BK
	EN-ALC-1R10V-GB2-BK/DR
Leviton	IP710-DLZ
Lutron	DVTV-XX
Wattstopper	ADF-120277
Synergy Lighting Controls	ISD BC

**Note:** The absence of a dimmer from this chart does not necessarily imply incompatibility.  
Please reference the dimmer manufacturer's instructions for installation.

---

## Warranty

eldoLED OPTOTRONIC® Products are covered by a 5-year limited warranty.  
Complete warranty terms can be found at: [www.eldoled.com/legal/terms-and-conditions](http://www.eldoled.com/legal/terms-and-conditions)
