HVTS

2X4, 2X2, 1X4 Center-Element Lay-in

HVTS is the newest staple of center-element lay-ins from HoloPhane® bringing high performance and expanded configuration opportunities all in a new aesthetically pleasing form factor. With millions of configurations available in this new luminaire, nLight® embedded wired or wireless controls, emergency battery packs, eldoLED® drivers and more, this fixture is perfect for a multitude of applications. Whether the application is healthcare, education, an industrial setting, commercial office, or something else, HVTS is ideal for your next project.

- + Wide, 7-inch curved lens – more width than ever to distribute the light
- + Less than 2 inches in depth – perfect for restrictive plenum spaces
- + Manufactured in North America – quicker lead times, even on non-stock orders
- + Beveled end-plates – the angle of the end-plate make a seamless transition from ceiling to light source
- + Matte white finish – a clean and flat look to create harmony in the ceiling
- + >125 Lumens per watt – efficiency you can count on
- + Embedded controls – bring a networked lighting controls platform to your indoor space through nLight®, or single room wireless controls with SensorSwitch™ JOT
- + Ease of install – Simple installation into grid and other ceiling types
