17-5/8"

20-5/8"

Feature Set

- Perfect Color™ consistency within 1/2-step MacAdam Ellipse
- 45° visual cut-off angle to source (65° cut-off for L7 length)
- Bounding Ray™ optical design ensures no source image up to cut-off angle, minimizing glare
- Available with 10%, 1%, or 0.1% dim to dark
- Downlight and Wall Wash trims are interchangeable
- 90% lumen maintenance at 55,000 hours
- Clean beams with soft transitions
- Batwing distributions with feathered edges to provide even illumination fixture-to-fixture
- Exceptional color with 80 CRI, 90 CRI, or 95 CRI min
- Field changeable optics available every 5°
- Wet Location optional, covered ceiling

ORDERING NOTES

1. 05LM or 80LM only available with ZT or ELV control input.
2. 05LM and 60LM not available with EZT or DALI on WW style fixtures for L7 cylinder length. 05LM, 70LM & 80LM not available with EZT or DALI for L12, L18 or L21 cylinder lengths.
3. 60LM & 70LM not available with L7 Cylinder Length.
4. 90CRI not available with 50K, 95CRI not available with 35K, 40K or 50K.
5. Not available with WW style function.
6. Not available with L7 cylinder length.
7. 347 only available with ZT control input. Min 07LM-40LM max. Not available with nLight, Emergency or SF options.
8. ZT not available with DARK
9. ELV only available with MIN1.
10. DALI and DMX only available with DARK.
11. nLight controls are provided with each fixture and can be remote mounted or mounted to the junction box. Wired NLIGHT and NLIGHTER controls include nPS 80 EZ dimming pack. Wireless NLTAIR2 and NLTAIREM2 controls include rPP20 power pack.
12. Not available with 05LM, 25LM or 30LM with EZT, DALI or DMX control input for L7 cylinder length. Not available with 05LM or 80LM with EZT or DALI control input for L12, L18 or L21 cylinder lengths.
13. WL only available with JBX. Max 30LM. Not available with DMX, UP or Emergency options. Not available with EZT or DALI in L7 cylinder length. Min 07LM-35LM Max with L12, L18 or L21 cylinder lengths.
14. LW not available with D style function.
15. Trim finishes are not available with WR, WRAMF, WMR, and BZR trim colors.
16. Replace TBD with applicable RAL number and finish when ready to order. See [BAL BROCHURE](#) for available color options.

ACCESSORIES – order as separate catalog numbers (shipped separately)

GCOLORS KIT	Architectural colors chip kit, consisting of powder-coat and plated finishes
GOTHAM IVO REFLECTOR COLOR KIT	Trim colors & finishes sample kit for standard IVO anodized and painted trim color options.

Cylinder Length

- Dimensions in inches [centimeters]
- L7 length Cylinder has a 65° visual cut-off angle and trims and optics that are not interchangeable with the other Cylinder lengths

Emergency Battery Sidecar Enclosure

How to Estimate Delivered Lumens in Emergency Mode

Delivered Lumens = 1.25 x P x LPW

P = Output Power/Wattage of Emergency Battery Driver (E7WR* = 7W, E10WR* = 10W, E15WR* = 15W)

LPW = Lumen per Watt rating of luminaire based on Ordering Code selections

Optical System

- Bounding Ray™ optical design delivers low brightness apertures for a comfortable lighting experience. Bounding Ray™ optical design ensures no source image up to cut-off angle, minimizing glare.
- 45° visual cut-off angle to source for L12, L18 and L21 lengths and 65° visual cut-off for L7 length per CIE 117-1995 Discomfort Glare in Interior Lighting ([UGR FAQ](#))
- Top-Down Flash characteristics avoid flash on trim until source becomes visible.
- Batwing distributions with feathered edges to provide even illumination fixture-to-fixture. Available with 0.8, 1.0, and 1.2 spacing-to-mounting-height ratio (s/mh).
- Clean beams with soft transitions from narrow spot 10° up to wide flood 60° distributions and available every 5°.
- Optics are field changeable. However, L5 Cylinder Length optics are not interchangeable with other Cylinder Length optics.

LED Light Engine

- Perfect Color™ consistency within 1/2-step MacAdam Ellipse using proprietary pick and place algorithm.
- 90% lumen maintenance at 55,000 hours.
- Available in 80, 90, or 95 CRI. 90 CRI has R9 greater than 50, 95 CRI has R9 greater than 80.

Trims

- Trims are field changeable via twist-lock (tool-free). However L5 Cylinder Length trims are not interchangeable with other Cylinder Lengths.
- Trims are available in 9 colors and 3 surface finishes (standard)
- Custom RAL and Paint colors available upon request.

Electrical

- 120, 277, 347, or Multi-Volt (MVOLT) 120-277 VAC input at 50/60 Hz.
- Power Factor > 85%.
- Input wires 18 AWG, 600V minimum, solid copper.

EMI/RFI

- EMI/RFI per FCC Title 47 CFR, Part 15, Class A rated standard.
- EMI/RFI per FCC Title 47 CFR, Part 15, Class B rated for Phase Dimming driver (ELV) except when used with Emergency Battery (E7WR, E10WR, E15WR) or at 15LM and above.

Controls (Optional)

- Luminaire can be equipped with interface for nLight wired, allowing it to communicate over an nLight network. nLight wired options ship with an nPS 80 EZ power pack to be mounted to a plenum j-box through (via 1/2" knockout) and connected to the Fixture control wires. Couple with nLight-enabled sensors, power packs, or WallPods using CAT-5 cabling to create an nLight Control Zone. Link Control Zone to a Gateway directly or via a Bridge for remote status monitoring and control using SensorView software.
- Luminaire can be equipped with interface for nLight Air, allowing it to communicate over the wireless nLight control platform. nLight Air options ship with an rPP20 power pack to be mounted to a plenum j-box through (via 1/2" knockout) and connected to the Fixture control wires. Can be paired to other luminaires and wall switches through CLAIRITY+, a mobile app, which allows individual fixture control.

Dimming

- Luminaire is capable of continuous dimming without perceivable flicker (stroboscopic) as measured by flicker index (ASNI/IES RP-16-10).
- Available dimming ranges include: 100%-10% (MIN10), 100%-1% (MIN1), and 100%-0.1% (DARK) of rated lumen output.
- Available with smooth shut off function from minimum dimming level to 0%.
- EldoLED drivers (EZT, DALI) conform to IEEE P1789 standards.
- Drivers are inaudible in 24dB environment and stable even when input voltage conditions experience typical commercial environment fluctuations.

Emergency Battery (Optional)

- Luminaires equipped with battery pack (E7WR, E10WR, E15WR) comply with NFPA 101 (Life Safety Code) and deliver constant light output for a duration of 90 minutes minimum with AC power loss.
- Emergency battery is mounted to ceiling via remote enclosure (sidecar).
- Emergency battery is CEC T20 compliant.

Installation

- Wall Mount can be oriented either Up or Down depending on ordering configuration
- Luminaire can be installed to 4" Octagonal j-box (1-1/2" or 2-1/8" deep depending on ordering configuration).
- Luminaire can be installed to 4" Square j-box (1-1/2" deep) when used with Cylinder Adaptor Plate (CYLBOXADPT SQ 4SQ2OCT).
- Optional, field configurable Conduit Covers are available and match Cylinder finish and size.

Construction

- Heavy-gauge extruded Aluminum construction.
- Reflector design allows air flow across heatsink to improve thermal management.
- Light Engine and Driver are field replaceable and serviceable from below the ceiling.

Listings

- Fixtures are CSA certified to meet US and Canadian standards.
- All fixtures are manufactured in strict accordance with the appropriate and current requirements of the "Standards for Safety" per UL.
- Damp Location standard.
- Wet Location available.

Photometrics

- All photometry is conducted by IESNA standard LM-79-08 in an accredited lab.
- LEDs are tested to LM-80 standards. Lumen maintenance is calculated via TM-21.

Warranty

- 5-year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: www.acuitybrands.com/support/warranty/terms-and-conditions

Note:

- Actual performance may differ as a result of end-user environment and application.
- All values are design or typical values, measured under laboratory conditions at 25 °C.
- The product images shown are for illustration purposes only and may not be an exact representation of the product.

A+ Capable Luminaire

This item is an A+ capable luminaire, which has been designed and tested to provided consistent color appearance and out-of-the-box control capability with simple commissioning when used with Acuity Brands controls products.

All configurations of this luminaire are calibrated and tested meet the Acuity Brands' specification for chromatic consistency - including color rendering, color fidelity and color temperature tolerance around standard CIE chromaticity coordinates.

To learn more about A+, visit www.acuitybrands.com/aplus.

Single Lighting Controls Platform for Indoor & Outdoor Spaces

nLight® is your networked lighting controls platform, for indoor and outdoor applications, providing wired or wireless options. Scaling from room to campus-wide applications, it is the one platform that grows with your business today and tomorrow; to seamlessly address energy cost optimization, building code compliance, improved occupant comfort, and much more. nLight also interfaces with DALI®, BACnet®, DMX and additional third-party devices.

nLightcontrols.com

Wired Controls

1. Install the luminaires and nPS 80 EZ controllers and make the low-voltage connections
2. Install the nLight Wired wall switch
3. Connect the nLight devices using standard CAT-5e cables and the controls devices will automatically discover each other and work (plug and play)

Wireless Controls

1. Install the luminaires and rPP20 power/relay packs
2. Install the nLight AIR battery-powered wall switch
3. Use CLAIRITY™ + mobile app to pair the luminaires with the wall switch and if desired, customize the device settings

UL924 Sequence of Operation

The below information applies to all nLight AIR devices with an EM option.

- EM devices will remain at their high-end trim and ignore wireless lighting control commands, unless a normal-power-sensed (NPS) broadcast is received at least every 8 seconds.
- Using the CLAIRITY+ mobile app, EM devices must be associated with a group that includes a normal power sensing device to receive NPS broadcasts.
- Only non-emergency rPP20, rLSXR, rSBOR, rSDGR, and nLight AIR luminaires with version 3.4 or later firmware can provide normal power sensing for EM devices. See specification sheets for control devices and luminaires for more information on options that support normal power sensing.
