### Description

The low profile HOLOBAY™ LED is the next generation of robust round high bays for the most demanding environments. Designed with features and unmatched electrical, environmental and thermal ratings while providing superior efficiency, visual comfort, exceptional illumination and ease of installation.

### Optics

- Prismatic borosilicate glass maintains the highest levels of luminosity over time.
- Glass doesn't fade, discolor, or otherwise degrade in harsh environments.
- Optional silicone rubber lens that will not brown, chip, shatter, or break.
- Five distributions available to achieve results from any mounting height.
- Prismatic optics combined with high efficiency LEDs achieve maximum spacing and superior uniformity.
- Optional uplight module provides 12-15% more output.
- Optics can be installed facing down or inverted (IVO)
- Certain airborne contaminants may adversely affect the functioning of LEDs and other electronic components, depending on various factors such as concentrations of the contaminants, ventilation, and temperature at the end-user location [Click here for a list of substances that may not be suitable for interaction with LEDs and other electronic components.](#)

### Mechanical

- Robust A380 cast aluminum housing with low copper content (3.5%) withstands hot and dirty environments.
- Super durable TGIC thermoset powder coat finish coupled with corrosion resistant primer is a five-stage pre-treating and painting process that yields over 5,000 hours salt rating per ASTM B117.
- Stainless steel hardware (410SS).
- Hinged electrical enclosure for easy access to components.
- Includes 2 additional ¾" NPT hubs (uses A356.0-T6 aluminum plugs) for wiring access in addition to the center pendant opening.
- Standard non-silicone gasket (EPDM).

**How to Estimate Delivered Lumens in Emergency Mode**

Use the formula below to estimate the delivered lumens in emergency mode

**Delivered Lumens = P x LPW**

P = Output power of emergency driver

LPW = Lumen per watt rating of the luminaire. (See charts on pages 7)

The LPW rating is also available at [Designlight Consortium](#)

P = 7 watts for IE07WCPHECW

P = 18 watts for IE18WCPHECWR

P = 20 watts for IE20WCPHER

P = 30 watts for IE30WCPHER
