

## Juno® Trac TCSS Series Linear Ambient Track Fixtures

Linear fixtures that enable a single lighting system to deliver both accent and ambient illumination

**juno®**

# Juno® Trac TCSS Series Linear Ambient Track Fixtures

## Linear Simplicity

Nothing could simplify life more for architects and lighting designers than being able to specify a single lighting system that delivers both accent and ambient illumination – and does both exceedingly well. Installers will also appreciate needing to only run a single power plane. Juno Trac Linear Ambient makes lighting a breeze on so many levels.

## End-to-End Illumination

Available in 2ft and 4ft versions, Juno Trac TCSS Series Linear Ambient luminaires can be installed end-to-end to simulate continuous illumination or spaced apart to integrate accent luminaires where needed. Its roughly 2"x2" profile enables it to blend seamlessly with the track and complementary accent lights.

## Specifications:

- 1000 lumens/ft. performance
- Up to 140 LPW efficacy
- 3500K, 4000K, 5000K CCTs, 80 CRI
- Standard phase-dimmable
- Optional alternate adapter compatibility enables installation on non-Juno track systems
