

**DIMENSIONS**

□ VMM9

**DETAILS**

**COMPANION LUMINAIRE(S)**

**CUSTOMIZATION**

Ask us about the following possibilities: Alternate section lengths, alternate distributions, alternate voltages, additional mounting options, custom colors, higher CRI and R9 values and other modifications.

**HIGHLIGHTS**

- Total System Integration features  
5-year limited warranty by Acuity Brands covering all components and construction
- 4 and 8' sections
- Up to 106 lm/W
- Three distributions available: (see page 2)
- High performance batwing distribution using light technology guide
- Softshine®-engineered comfort optics
- Flicker-free dimming to dark (0.1%) powered by eldoLED® driver
- Integrated nLight® control module for system networking (optional)
- Integrated sensor for daylight dimming and/or occupancy detection (optional)
- Squared or rounded end caps
- White, black, painted aluminum or custom color

**LUMEN PACKAGES** Based on 3500K. Additional color temperatures available.

Indirect /Direct LED Output	ID1100LMF	ID1350LMF
Delivered Lumens Per Foot	1095	1370
Input Watts Per Foot	9.5	12.8
Lumens Per Watt	115	106

\*per 4' section

**STANDARD DISTRIBUTION**

60% Up | 40% Down

## SPECIFICATIONS

### Housing

Extruded aluminum housing.

### End Caps

Die-cast aluminum end caps are mechanically attached with no exposed fasteners. Squared end caps standard. For rounded end caps, choose option RDEP.

### Color

Color for housing and end caps is white, black or painted aluminum. Consult factory for custom colors.

### Luminaire Length

4' and 8' lengths in a single section for nominal suspension spacing of 4' and 8'. For total length, add 2 1/8" for each end cap. Longer rows are comprised of starter, joiner and end sections.

### Source

Two LED lumen packages and three available color temperature options (3000K, 3500K and 4000K) — all within 2.5 MacAdam ellipses.

### Optics

Softshine® optical system consists of high performance acrylic lens and microstructure film.

### Embedded Sensor

Optional sensor is embedded directly into the lens surface following Peerless' proprietary SubtleView Integration™ process.

### Remote Dimming Driver

Remote eldoLED® driver (see page 3) provides "natural dimming" with smooth, continuous and flicker-free dimming to dark (0.1%). Syncing for controls: 2mA max. THD: < 20%. Insignificant inrush current at 120 and 277VAC. FCC Class A and B tested for EMI and RFI.

When Control Input of 0-10V is specified driver will be set for linear dimming curve, if nLIGHT is specified driver will be set for logarithmic dimming curve.

### Controls and System Networking Options

For wired networking via Cat-5e, choose an integrated nLight® module. For daylight dimming and/or dual technology occupancy detection, see Integrated Sensor Layout Page for more details.

### Electrical

LED light engine — consisting of modular LED boards and eldoLED® dimming driver — is rated for 60,000 hours (L80) at 25° C ambient temperature. Specify 120V, 277V or 347V. Pre-wired with 16AWG fixture wire. For special circuiting or wire gauge, consult factory. Plug-in electrical connectors included.

### Environment

Suitable for damp location.

### Validation

CSA/CUS listed. CSA tested to UL 1598 standards. LM-79 tested. Individual sections meet FCC Part 15 requirements.

### Packaging

Recycled cardboard box and inserts. Biodegradable, protective luminaire bag. Recycled kraft paper tape.

### Government Procurement

BAA - Buy America(n) Act: Product qualifies as a domestic end product under the Buy American Act as implemented in the FAR and DFARS. Product also qualifies as manufactured in the United States under DOT Buy America regulations.

BABA - Build America Buy America: Product qualifies as produced in the United States under the definitions of the Build America, Buy America Act.

Please refer to [www.acuitybrands.com/resources/buy-american](http://www.acuitybrands.com/resources/buy-american) for additional information.

### Warranty

5-year limited warranty. Complete warranty terms located at [www.acuitybrands.com/support/customer-support/terms-and-conditions](http://www.acuitybrands.com/support/customer-support/terms-and-conditions)

Note: Actual performance may differ as a result of end-user environment and application.

All values are design or typical values, measured under laboratory conditions at 25 °C.

### A+ Capable Luminaire

This item is an A+ capable luminaire, which has been designed and tested to provide consistent color appearance and out-of-the-box control compatibility with simple commissioning.

- All configurations of this luminaire meet the Acuity Brands' specification for chromatic consistency
- This luminaire is part of an A+ Certified solution for nLight® control networks when ordered with drivers marked by a shaded background\*
- This luminaire is part of an A+ Certified solution for nLight control networks, providing advanced control functionality at the luminaire level, when selection includes driver and control options marked by a shaded background\*

To learn more about A+, visit [www.acuitybrands.com/aplus](http://www.acuitybrands.com/aplus).

\*See ordering tree for details

A+ Capable options indicated by this color background.

**VIEW FROM TOP**

**LINEAR PLAN:**

PEERLESS offers the ability to provide a continuous run plan to suit your requirements by optionally offering three different methods of configuration.

**LSL- Linear Same Length:**

In this configuration, each segment is the same length and is standardized based on the longest length available and is the only option provided. Because it is dependent on one segment length there are mathematical limitations on what overall row lengths can be achieved. Example: 20 FT row would be achieved with 5, 4 FT long segments equaling 20 FT (nominal).

**LSL**

4FT	4FT	4FT	4FT	4FT
-----	-----	-----	-----	-----

**LLP- Linear Longest Possible**

In this configuration, the longest length available is optimized, resulting in the fewest segments and mounting locations. Caution, should be used where balanced appearance is a concern. Example: 20 FT run would have 2, 8 FT segment and 1, 4 FT segment at the end of the run.

**LLP**

8 FT	8 FT	4FT
------	------	-----

**REMOTE DRIVER MOUNTING**

The driver is housed in a remote-mounted, aluminum enclosure. In T-bar ceiling installations, the driver enclosure attaches to the grid bars with provided hanging brackets and clips. For hard ceiling installations, the driver enclosure resides inside an electrical room and can be mounted to a rack or wall with screws (by others), if necessary.

NOTE: Every 4' and 8' luminaire section comes with (1) driver enclosure and each section has (1) low voltage D.C. power feed leading out of the luminaire. See installation instructions for further details.

**MOST COMMON MOUNTING TYPES AND OPTIONS** Options available for this specific luminaire are checked in the boxes below.

**Mounting Type**

- F1/** For use with most T-Bar and screw slot grid ceilings. Designed for on-grid and off-grid applications.
- F2/** For use with recessed or surface mount horizontal J-box applications.

For more detailed mounting drawings and information, see [peerlesslighting.acuitybrands.com/resources](http://peerlesslighting.acuitybrands.com/resources)

Indicates mounting options available with this luminaire.

### INTEGRATED SENSOR OPTIONS

Control Input	Integrated Sensor	Daylight Dimming	Daylight Dimming and/or Occupancy Detection	nLight Wired Networking	Link to Spec Sheet
NLIGHT	ADC	X		X	<a href="#">nES-ADCX</a>
NLIGHT	PDT		X	X	<a href="#">nES-7</a>
ZT	ADC	X			<a href="#">nES-ADCX</a>
ZT	PDT		X		<a href="#">nES-7</a>

Daylight harvesting deactivated by default and field programmed per sequence of operations for PDT sensor options.

Luminaires specified with nLight system networking ship with one RJ-45 connector integrated into the luminaire, 10' of Cat-5e cable and a splitter to control the entire luminaire row (depending on wattage/voltage limitations). For multiple zones, please contact [TechSupport@PeerlessLighting.com](mailto:TechSupport@PeerlessLighting.com).

### OCCUPANCY DETECTION COVERAGE

At the 7.5 ft (2.9 m) hanging height of a typical pendant mount fixture the sensor provides 10 ft (3.05 m) radial detection of small motion. At a 9 ft (2.74 m) hanging height the radius is 12 ft (3.66 m) for small motion.

Adequate for walking motion detection from mounting heights between 7.5 ft (2.29 m) and 20 ft (6.10 m).

Initial detection will occur earlier when walking across sensor's field of view than when walking directly at sensor.

Initial detection of walking motion into long coverage segment will occur at distances of 2x the mounting height up to 15 ft (4.57 m) and 1.75x up to 20 ft (6.10 m). Lens assembly rotates 15° to enable adjustment in order to line up long segments.

### COMPATIBLE nLIGHT COMPONENTS WITH INTEGRATED CONTROLS

nPODM DX WH    nPODM 2P DX WH    nPODM 4P DX WH

**INTEGRATED SENSOR LAYOUT**

**CORRECT:**

32FT MSL8 RUN WITH 2 SENSORS WITH PRIMARY ZONE 24FT AND SECONDARY ZONE 8FT -- PDT24 SADC8

32FT MSL8 RUN WITH 1 SENSOR ALL ONE ZONE -- ADC

**INCORRECT:**

32FT MSL8 RUN WITH 1 SENSOR ALL ONE ZONE -- PDT16

32FT MSL8 RUN WITH 2 SENSORS WITH PRIMARY ZONE 20FT AND SECONDARY ZONE 12FT -- PDT20 SADC12

**Notes:**

- Only one sensor per zone
- At the most, the entire run can only have 2 sensors (thus 2 sensors zones at the most)
- Sensor zone can not split fixture sections
- No overlapping zones
- One nLight or NLTAIR2 device per zone or per sensor, for multiple zones without sensors contact factory
