The Shape of Things to Come...
...is Here Now.

The Square and Round forms may be familiar.
But the superior way these luminaires function with...

Intelligent Technologies

Sophisticated Optics

and

Specialized Configurations

...is uniquely Peerless.

Intelligent Technologies

Run Circles 'Round the Competition

Round 4 Direct

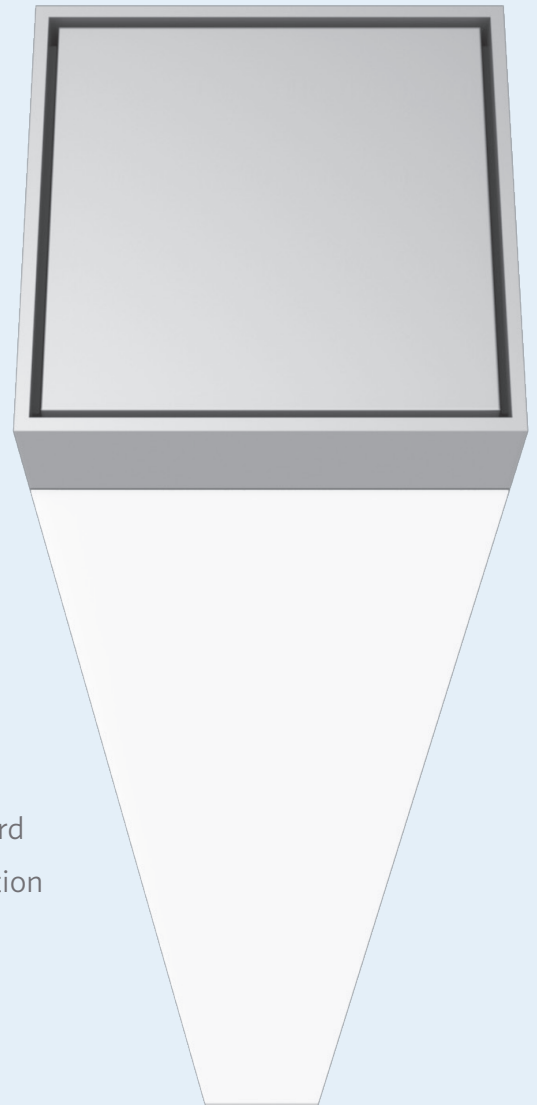

Square and Round 4 are smart luminaires. They offer the best in energy-saving LED technology and can be specified with digital technologies that boost performance and extend functionality.

True Architectural Dimming

A 0-10V digital eldoLED® driver provides smooth, seamless and flicker-free dimming to black (0.1%). Similar to incandescent dimming, this *natural dimming* attains the deepest dimming levels without dropout and without a visual flash when powering on.

eldoLED® Single-circuit dimming is standard on all luminaires. Dual circuit switching, available in the suspended I/D models, allows the indirect and direct portions to be controlled separately.

These advanced dimming capabilities help save energy and prolong the life of the LED modules. More importantly, they set a new standard in architectural LED dimming whereby users can enjoy ideal illumination at any level across the spectrum for each and every lighting scenario.

Daylight Dimming & Occupancy Detection

Save energy with an optional, integrated nLight® sensor that provides daylight dimming and/or dual technology occupancy detection via passive infrared (motion) and Microphonics™ (sound) technologies.

Digital Lumen Management

A built-in, nLight digital lumen management option delivers constant lumen output throughout the luminaires' lifetime, extends the longevity of the LEDs and saves roughly 10% in energy use.

By intelligently maintaining light output at 80% of initial lumen output, the need to over-light spaces to compensate for lumen depreciation (as is often done with fluorescent sources) is eliminated.

System Networking

For networking with nLight system controls, the majority of Square and Round 4 luminaires can be specified with an optional, nLight nIO module pre-installed inside the luminaire housing and an accessible, topside network port that allows for easy Cat-5e "plug-and-play" connectivity.

Square I/D

Sophisticated Optics

Shape the Light Fantastic

Square I/D; Square Wall I/D; Square Direct

Square and Round 4 exemplify our mantra of *Lighting for People®* by providing quality, color-consistent illumination (80+ CRI at 3000K, 3500K or 4000K) that helps keep eyes thriving.

Kind-to-the-Eyes Illumination

With reflectors and lenses designed to control and diffuse light following our proprietary Softshine® optical engineering standards, Square and Round 4 emit soft, uniform and comfortable illumination that minimizes eyestrain and fatigue.

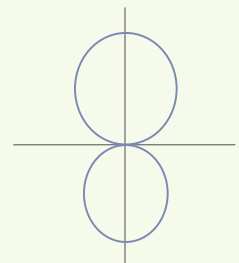

Ceiling Uniformity + Glare-Free Downlight

In both luminaires, a proprietary injection molded optic refracts light to where it is needed most. The result is indirect illumination that is flat and broad across the ceiling with no hot spots and direct illumination that cuts off high-angle glare.

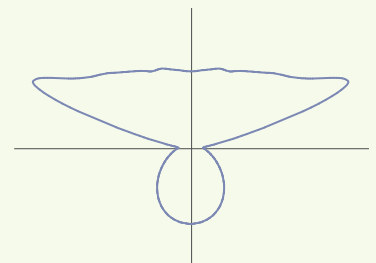

Softshine® optical engineering is a process where we actively shape and direct the light output from our luminaires to provide best-in-class distribution and visual well-being.

Competitor LED I/D

Peerless Round I/D & Square I/D

Specialized Configurations

Square the Deal

Square I/D with "L" pattern connectors

Continuous Glowing Lenses

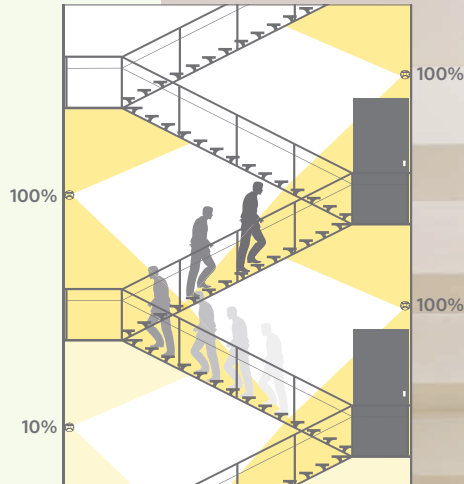

Square and Round 4 both feature fully illuminated continuous lenses that extend across the entire length of the luminaire. Made from optical-grade acrylic, the sophisticated lens not only softens light output, it hides individual LEDs from sight producing a visually pleasing, glowing band of illumination.

Illuminated Corners

On Direct, Indirect and I/D suspended models, Square and Round 4 can be configured to provide seamless "L" corner illumination where two luminaires join together.

Stairway Luminaires

To easily meet code requirements and save energy when lighting stairway environments, choose a Wall Stairway luminaire. These luminaires, available in both I/D and Direct distributions, come with an embedded nLight occupancy detection sensor that is pre-programmed to remain at either 10% or 50% illumination when the stairway is unoccupied and brighten to 100% illumination once occupancy is detected.

Round 4 Wall Stairway I/D

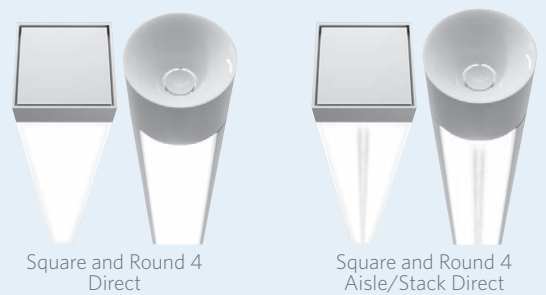

Round 4 Aisle/Stack I/D

Aisle/Stack Luminaires

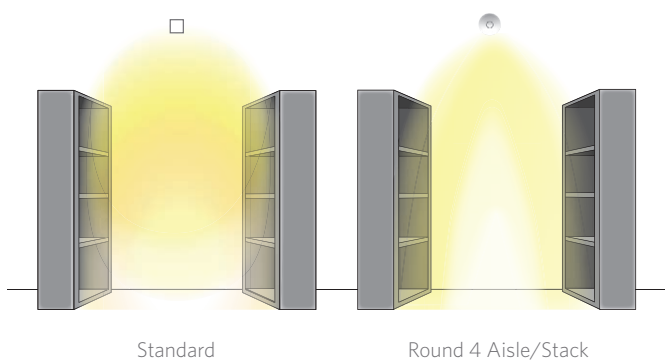

Uniformly illuminate vertical surfaces on both sides of 3' to 7' aisles with Aisle Stack I/D and Direct models. These luminaires have specially designed optics that evenly direct light in an inverted "V" down library stacks, grocery shelves and other displays.

With this unique Aisle/Stack optic (ASO), please note a linear shadowing effect appears down the center of the lens as shown.

3' Aisle	Standard 20W	Square/Round ASO LO	Square/Round ASO HI	IES RP-1
Average illumination on face of stack	24 fc	22 / 22 fc	42 / 42 fc	
Min. illumination @ 1' above floor	8.7 fc	10 / 10 fc	20 / 19 fc	≥10 fc
Uniformity (max:min between 1'- 7' AFF)	4.5:1	3.2:1	3.2:1 / 3.5:1	<5.0:1

7' Aisle	Standard 40W	Square/Round ASO HI
Average illumination on face of stack	27 fc	22 / 23 fc
Min. illumination @ 1' above floor	15 fc	17 fc / 17 fc
Uniformity (max:min between 1'- 7' AFF)	2.6:1	1.6:1 / 1.6:1

Calculation Notes:

Suspension length for 3' aisle is 8.5'; 7' aisle is 9.5'

- 80/50/20 ceiling/walls/floor reflectance
- 3500K
- .85 LLF (light loss factor) includes:
 - .87 LLD (lamp lumen depreciation)*
 - .98 RSDD (room surface dirt depreciation)
 - and LDD (luminaire dirt depreciation)

*LLD for LEDs is based on approximation of lumens at mean life (see Key Resources page on website for details)

The Right Light in All the Right Places

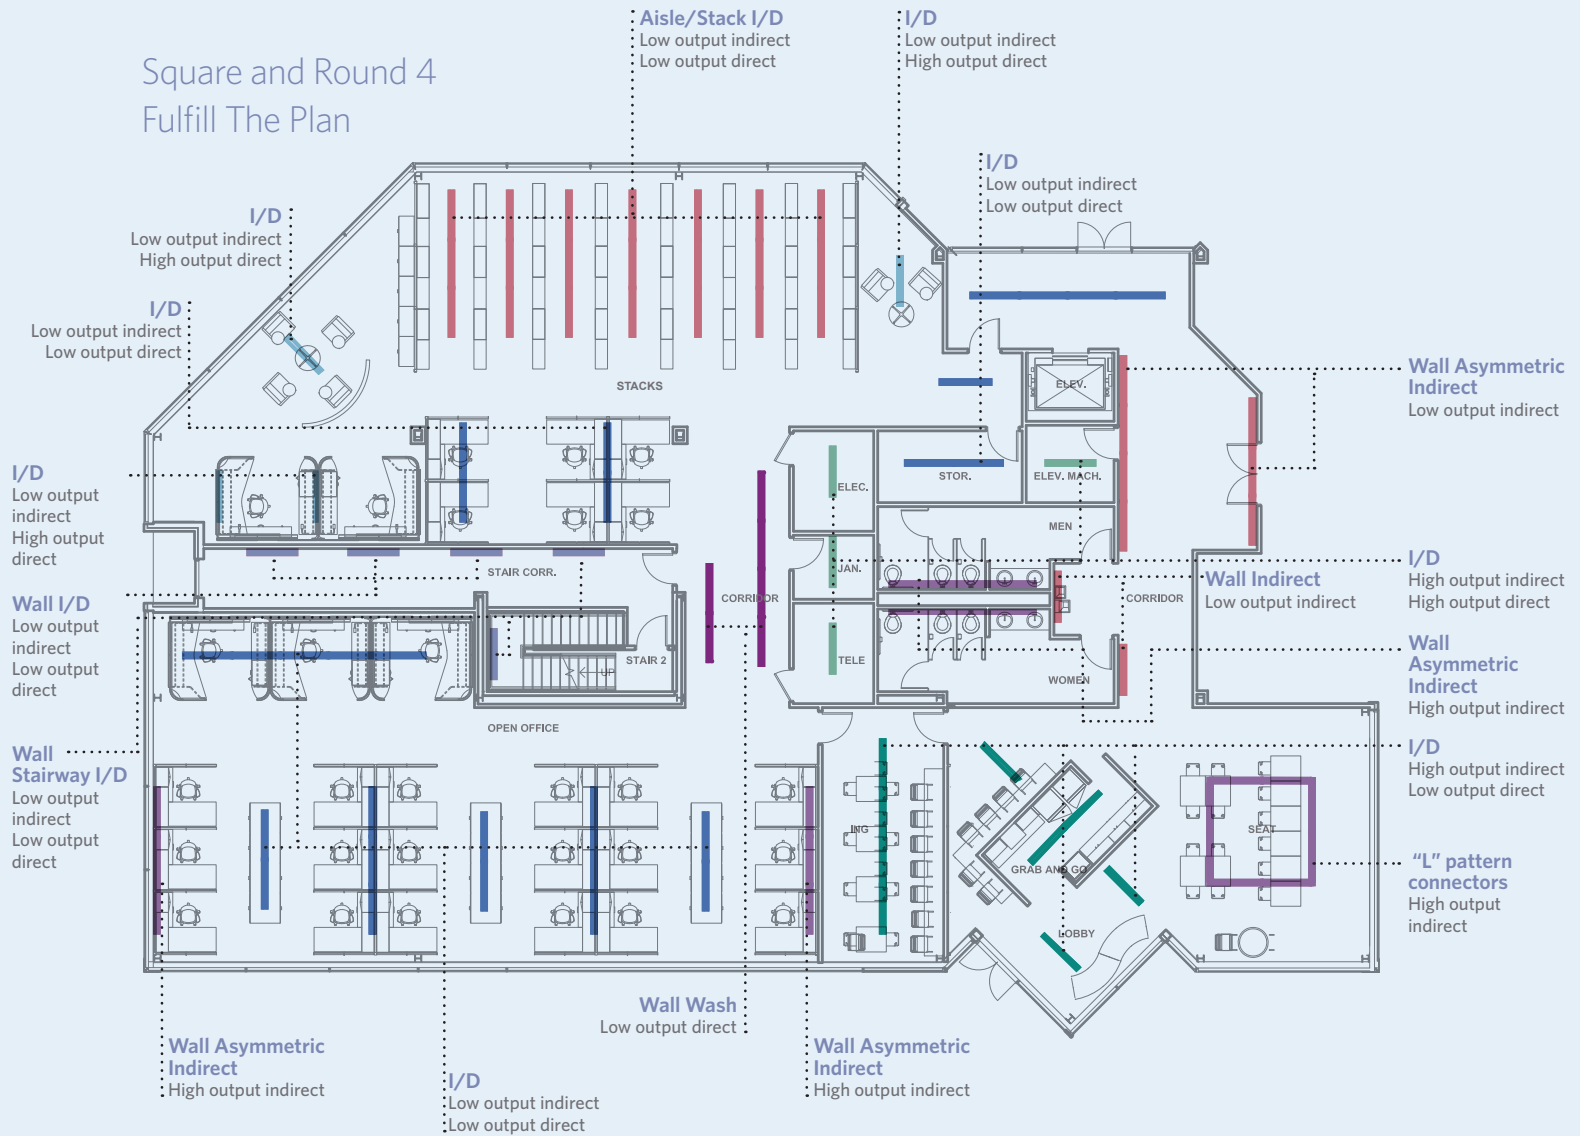

Square Indirect-Direct; Square Surface Direct

Single Design Vocabulary

With suspended, wall and surface models available with indirect, direct, I/D distributions as well as with special aisle/stack and stairway optics, Square and Round 4 luminaires are well-suited for a wide variety of interior applications.

In other words, you'll find both operational and aesthetic harmony across each family enabling you to conveniently deliver both consistency and versatility from one product suite throughout your lighting project.
