

## FEATURES & SPECIFICATIONS

**INTENDED USE** — The 2ESL2RE LED Relight assembly is designed to convert Lithonia existing 2ES8 fixture to highly efficient LED performance in a variety of applications and mounting heights.

**CONSTRUCTION** — LED panels with integral diffuser assembly install in place of existing fluorescent reflectors, using 4 tek screws for support and positioning.

Intelligent programmable driver installs in place of fluorescent ballast, and electrical components plug together for quick and simple installation.

**OPTICS** — LED light panel and diffuser assemblies are designed to provide consistent, uniform lighting in conjunction with existing louvered doorframe. Panels are designed to use existing mounting brackets to optimize source-to-aperture distance.

**ELECTRICAL** — Long-life LEDs, coupled with high-efficiency drivers, provide superior quantity and quality of illumination for extended service life. 80% LED lumen maintenance at 60,000 hours (L80/60,000).

eldoLED driver options deliver choice of dimming range and choices for control, while assuring flicker-free, low-current inrush, 89% efficiency and low EMI.

Optional integrated nLight® controls make each luminaire addressable — allowing it to digitally communicate with other nLight-enabled controls such as dimmers, switches, occupancy sensors and photocontrols. Simply connect all the nLight-enabled control devices and the 2ESL2RE luminaires using standard Cat-5 cabling. Unique plug-and-play convenience as devices and luminaires automatically discover each other and self-commission.

Lumen Management: Unique lumen management system (option N80) provides onboard intelligence that actively manages the LED light source so that constant lumen output is maintained over the system life, preventing the energy waste created by the traditional practice of over-lighting.

Step-level dimming option allows system to be switched to 50% power for compliance with common energy codes while maintaining fixture appearance.

Driver disconnect provided where required to comply with US and Canadian codes.

**Enabled with Atrius™** — Select models of this product line are enabled with Atrius, making them part of the Atrius Sensory Network and ready to deliver valuable data and connectivity to the Atrius Platform. For more information concerning Atrius solutions, please refer to [www.acuitybrands.com/Atrius](http://www.acuitybrands.com/Atrius).

**INSTALLATION** — After existing fluorescent components are removed from housing, universal end brackets are fastened in place with tek screws. The LED light engine assembly mounts to the end brackets and hangs securely while the wiring connection is made using a driver-disconnect plug system provided as standard. The light engine then swings up into position and is secured in place with a captive screw at each end. The door frame is then inserted via a sliding hinge into the end bracket and secured in the closed position with a rotating cam latch. Light engine may be removed from fixture during service. LED boards include plug-in connectors for easy replacement or servicing. Suitable for damp location installations.

**LISTINGS** — UL listed. DesignLights Consortium® (DLC) qualified product. Not all versions of this product may be DLC qualified. Please check the DLC Qualified Products List at [www.designlights.org/QPL](http://www.designlights.org/QPL) to confirm which versions are qualified.

**WARRANTY** — 5-year limited warranty. Complete warranty terms located at: [www.acuitybrands.com/support/warranty/terms-and-conditions](http://www.acuitybrands.com/support/warranty/terms-and-conditions)

**Note:** Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25 °C. Specifications subject to change without notice.

### Specifications

Intended for installation in 2ES8 host fixtures.

### A+ Capable Luminaire

This item is an A+ capable luminaire, which has been designed and tested to provide consistent color appearance and out-of-the-box control compatibility with simple commissioning.

- All configurations of this luminaire meet the Acuity Brands' specification for chromatic consistency
- This luminaire is part of an A+ Certified solution for nLight® control networks when ordered with drivers marked by a **shaded background**\*
- This luminaire is part of an A+ Certified solution for nLight control networks, providing advanced control functionality at the luminaire level, when selection includes driver and control options marked by a **shaded background**\*

To learn more about A+, visit [www.acuitybrands.com/aplus](http://www.acuitybrands.com/aplus).

### Enabled with Atrius™ Notes

- A Only available with EZ1 or EOHN driver (consult factory).
- B No Occupancy control available.
- C Lower lumen packages will lose VLC functionality when dimmed.

### Notes

- 1 Approximate lumen output.
- 2 Option ships separately as a field-installed accessory. Verify compliance with local codes prior to ordering.
- 3 No external access to n10
- 4 CP host housing required.
- 5 Not available with N80, N80EMG, N100, or N100EMG, Not available with PWS1836, PWS1846, PWS1856LV or PWS1846 PWSLV
- 6 Not available with nLIGHT

2-lamp T8	F32T8U	0.88	60	41

## FIT COMPATIBILITY

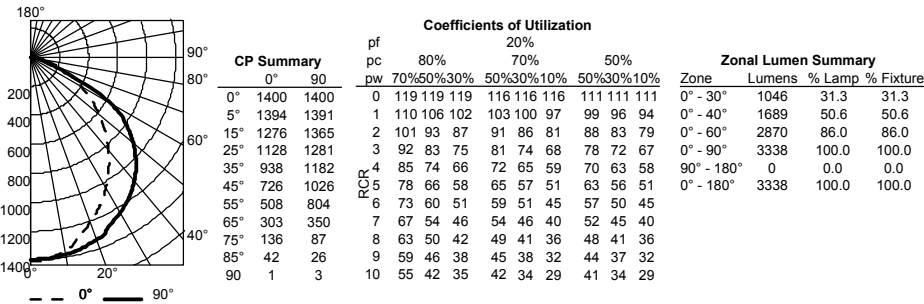

The 2ESL2RE Relight assembly was engineered to upgrade recessed 2X2 fixtures, including most parabolic and lensed troffers from all major manufacturers.

Dimensional requirements are below but Lithonia Lighting recommends a trial installation prior to purchasing project quantities.

## PHOTOMETRICS

2ESL2RE 33L EZ1 LP835, 3338 delivered lumens, test no. 109634P10, tested in accordance to IESNA LM-79

2ESL2RE 40L EZ1 LP835, 4156 delivered lumens, test no. 109634P14, tested in accordance to IESNA LM-79
