

## DIMENSIONS

### BRM9L

## DETAILS

## HIGHLIGHTS

- Mainstream Dynamic Tunable White with nTune™ Technology
- Integrated nLight® for system networking
- 4', 5', 6', 8' and 10' Sections
- Up to 139 lm/W
- Multiple Outputs available
- Softshine®-engineered comfort optics
- High performance batwing distribution using injection molded optic
- Flicker-free dimming to dark powered by eldoLED® driver
- Integrated sensor for daylight dimming and/or occupancy detection (optional)
- Flat or sculptured end caps
- White, black, aluminum or custom color

## LUMEN PACKAGES

Based on standard distribution (70/30) at 80CRI.  
Additional distributions and color temperatures available.

**MAINSTREAM DYNAMIC**  
BY ACUITY BRANDS®

## SPECIFICATIONS

### Housing

Nominal 8 1/8" x 1 3/4" rectangular housing is formed from cold-rolled steel.

### End Caps

Die-cast end caps are mechanically attached with no exposed fasteners. Flat end caps standard. For sculptured end caps, choose option SCEP.

### Color

Color for housing and end caps is white, black or painted aluminum. Consult factory for custom colors.

### Luminaire Length

Luminaire is available in 4', 5', 6', 8' and 10' sections. Using internal joiners, any section combination can be joined to form longer rows with almost 1ft incremental lengths. Add 5/8" for each flat end cap and 4" for each sculptured end cap.

### Source

Multiple LED lumen packages, with end points, falling within 2.5 MacAdam ellipses.

### Optics

Softshine® optical system consists of high performance lens, diffusers and metal reflectors.

### Dimming Driver

eldoLED driver provides "natural dimming" with smooth, continuous and flicker-free operation to 0.1% dim levels. Acuity luminaires incorporating eldoLED LED drivers perform within the recommended operating areas for flicker as a function of frequency and modulation (%) outlined in IEEE Standard 1789-2015 (IEEE Recommended Practices for Modulating Current in High-Brightness LEDs for Mitigating Health Risks to Viewers), in typical operating conditions at representative dimming levels. THD: < 20%. Insignificant inrush

current at 120 and 277VAC. FCC Class A and B tested for EMI and RFI. When Control Input of 0-10V is specified driver will be set for linear dimming curve, if nLIGHT is specified driver will be set for logarithmic dimming curve.

### Mainstream Dynamic with nTune Technology:

This luminaire is enabled with nTune technology, meaning it has the ability to communicate digitally over an nLight network. When wired, using CAT-5 cabling, with other nLight-enabled sensors, power packs, or WallPods, an nLight control zone is created. Once linked to a Gateway, directly or via a Bridge, the zone becomes capable of timeclock control, remote status monitoring, and control via SensorView software.

### Controls and System Networking Options

Wired networking via Cat-5e. For daylight dimming and/or dual technology occupancy detection, see Page 5 for integrated sensor options. Included Cat-5e cable; connect continuous sections together. Minimal cable may be visible at joining sections from above fixture.

One control module per 4' section.

### Electrical

LED light engine — consisting of modular LED boards and eldoLED® dimming driver — is rated for 50,000 hours (L80) at 25° C ambient temperature. Specify 120V or 277V. Pre-wired with 16AWG fixture wire. For special circuiting or wire gauge, consult factory. Plug-in electrical connectors included.

### Environment

Suitable for damp location.

### Validation

CSA/CUS listed. CSA tested to UL 1598 standards. LM-79 tested. Individual sections meet FCC Part 15 requirements.

### Packaging

100% post-consumer recycled cardboard box and inserts. Biodegradable, protective luminaire bag. Recycled kraft paper tape.

### Warranty

5-year limited warranty. Complete warranty terms located at [www.acuitybrands.com/support/warranty/terms-and-conditions](http://www.acuitybrands.com/support/warranty/terms-and-conditions)

Note: Actual performance may differ as a result of end-user environment and application.

All values are design or typical values, measured under laboratory conditions at 25°C.

### A+ Capable Luminaire

This item is an A+ capable luminaire, which has been designed and tested to provide consistent color appearance and out-of-the-box control compatibility with simple commissioning.

- All configurations of this luminaire meet the Acuity Brands' specification for chromatic consistency
- This luminaire is part of an A+ Certified solution for nLight® control networks when ordered with drivers marked by a shaded background\*
- This luminaire is part of an A+ Certified solution for nLight control networks, providing advanced control functionality at the luminaire level, when selection includes driver and control options marked by a shaded background\*

To learn more about A+, visit [www.acuitybrands.com/aplus](http://www.acuitybrands.com/aplus).

\*See ordering tree for details

## FIXTURE PERFORMANCE DATA

### How to Calculate Delivered Lumens in Emergency Mode

Use the formula below to determine the delivered lumens in emergency mode

**Delivered Lumens = 1.25 x P x LPW**

P = Output power of emergency driver. P = 10W for E10WLCP option.

LPW = Lumen per watt rating of the luminaire. This information is available on the ABL luminaire spec sheet. LPW = Lumen per watt rating of the luminaire. LPW information available in Performance Data section.

## EXPECTED LIFE L80@50,000 HOURS

## CCT SCALING CHART

Direct		
CCT	CRI	MULTIPLIER
27K	80CRI	0.96
30K	80CRI	0.99
35K	80CRI	1
40K	80CRI	1
50K	80CRI	1.05
27K	90CRI	0.81
30K	90CRI	0.83
35K	90CRI	0.85
40K	90CRI	0.86
50K	90CRI	0.92

**\*Note:** Also applicable to linear runs. Each 4' fixture section must be connected, by CAT5 cable, to another fixture.

## LINEAR PLAN:

PEERLESS offers the ability to provide a continuous run plan to suit your requirements by optionally offering three different methods of configuration.

### LSL- Linear Same Length:

In this configuration, each segment is the same length and is standardized based on the longest length available and is the only option provided. Because it is dependent on one segment length there are mathematical limitations on what overall row lengths can be achieved. Example: 20 FT row would be achieved with 5, 4 FT long segments equalling 20 FT (nominal).

LSL	4FT	4FT	4FT	4FT	4FT
-----	-----	-----	-----	-----	-----

### LLP- Linear Longest Possible

In this configuration, the longest length available is optimized, resulting in the fewest segments and mounting locations. Caution, should be used where balanced appearance is a concern. Example: 20 FT run would have 2, 8 FT segment and 1, 4 FT segment at the end of the run.

LLP	8 FT	8 FT	4FT
-----	------	------	-----

## WEIGHTS & SUPPORT SPACING

Suspension spacing equals section length. Default location shown.

"Beginning of run fixture's center to center support spacing will be 13/16" less than the nominal fixture section length. Refer to Individual Fixture table for specific dimensions"

INDIVIDUAL FIXTURES (MOUNTING)							
ORDERED LENGTH	"A" O.A.L.	"B"	"C-1"	"C-2"	STANDARD END CAP* (*Including end caps on both sides)	SCULPTED END CAP* (*Including end caps on both sides)	APPROX. WEIGHT

**MOST COMMON MOUNTING TYPES AND OPTIONS** Options available for this specific luminaire are checked in the boxes below.

**Mounting Type**

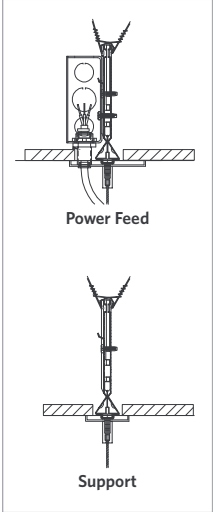

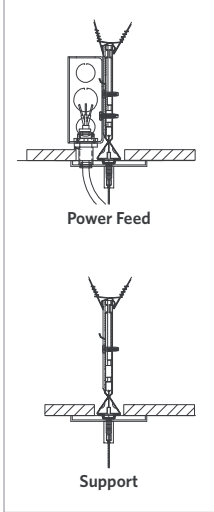

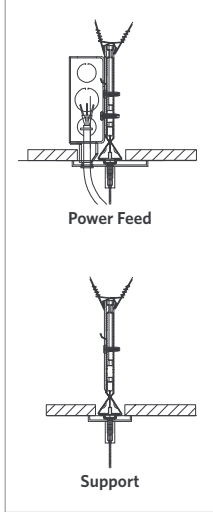

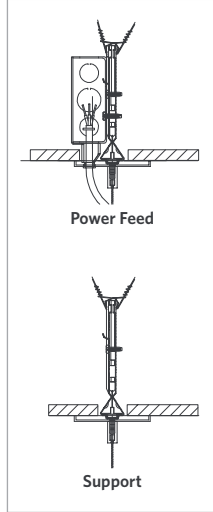

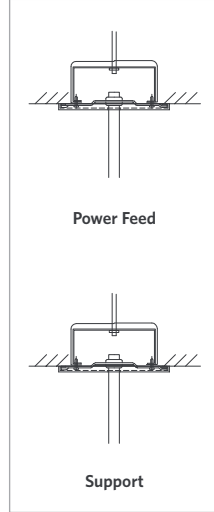

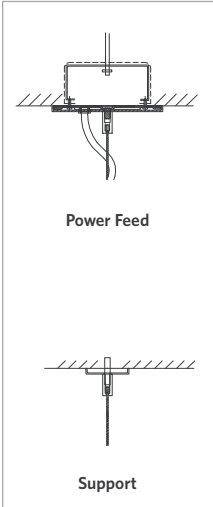

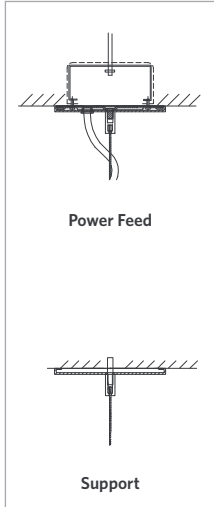

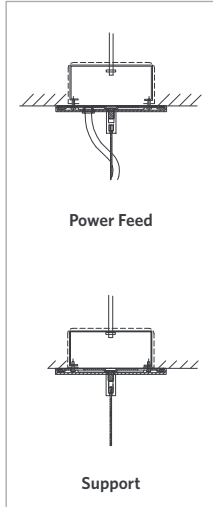

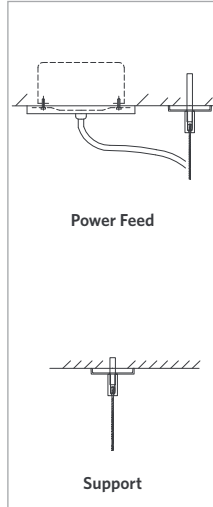

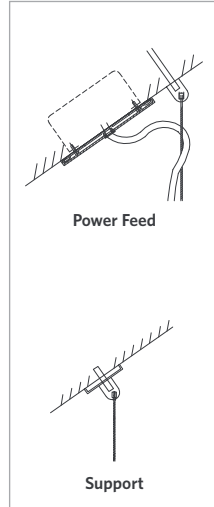

- F1/** For use with most T-Bar and screw slot grid ceilings. Designed for on-grid and off-grid applications.
- F2/** For use with recessed or surface mount horizontal J-box applications.
- F3/** Stem mounting for use with recessed or surface mount horizontal J-box applications. *Check with local jurisdiction regarding rigid stem code requirements.*
- F1A/** For use with most T-Bar and screw slot grid ceilings. Designed for on-grid and off-grid applications. *Comes complete with vertical J-box with built-in wire way. See also CP.*

**Mounting Options**

- MCS** Matching canopy at support for aesthetics.
- MCSJ** Matching canopy for J-box mounting at non-power feed support locations.
- OJB** Offset J-box at feed.
- SLP OJB** Sloped ceiling couplers and offset J-box option at feed.

For more detailed mounting drawings and information, see [peerlesslighting.acuitybrands.com/resources/product-resources](https://peerlesslighting.acuitybrands.com/resources/product-resources)

## INTEGRATED SENSOR LAYOUT

### CORRECT:

32FT MSL8 RUN WITH 2 SENSORS WITH PRIMARY ZONE 24FT AND SECONDARY ZONE 8FT -- PDT24 SADC8

### Notes:

- Only one sensor per zone
- At the most, the entire run can only have 2 sensors (thus 2 sensors zones at the most)
- Sensor zone can not split fixture sections
- No overlapping zones

32FT MSL8 RUN WITH 1 SENSOR ALL ONE ZONE -- ADC

### INCORRECT:

32FT MSL8 RUN WITH 1 SENSOR ALL ONE ZONE -- PDT16

32FT MSL8 RUN WITH 2 SENSORS WITH PRIMARY ZONE 20FT AND SECONDARY ZONE 12FT -- PDT20 SADC12

## INTELLIGENT LUMINAIRE TECHNOLOGY GUIDE

Choose nomenclature from these columns					
Driver Configurations	Minimum Dimming Level	Control Input	Driver	Dimming Range	Notes
	DARK	+ NLT	= eldoLED DualDrive	100% to .1%	Logarithmic Dimming, nIO EZDL CCT with luminaire
Control + Sensor Configurations	Control Input	Sensor	Sensor	Notes	
	NLIGHT	+ ADC	= SensorSwitch NES ADCX	nLight control Daylight Sensor	
	NLIGHT	+ PDT	= SensorSwitch NES PDT 7	nLight control Occupancy sensor	
	NLIGHT	+ APDT	= SensorSwitch NES PDT 7 ADCX	nLight control Daylight with Occupancy Sensor	

Daylight harvesting deactivated by default and field programmed per sequence of operations.

Luminaires specified with nLight system networking ship with one RJ-45 connector integrated into the luminaire, 10' of Cat-5e cable and a splitter to control the entire luminaire row (depending on wattage/voltage limitations). For multiple zones, please contact [TechSupport-Peerless@AcuityBrands.com](mailto:TechSupport-Peerless@AcuityBrands.com).

## OCCUPANCY DETECTION COVERAGE

At the 7.5 ft (2.9 m) hanging height of a typical pendant mount fixture the sensor provides 10 ft (3.05 m) radial detection of small motion. At a 9 ft (2.74 m) hanging height the radius is 12 ft (3.66 m) for small motion.

Adequate for walking motion detection from mounting heights between 7.5 ft (2.29 m) and 20 ft (6.10 m).

Initial detection will occur earlier when walking across sensor's field of view than when walking directly at sensor.

Initial detection of walking motion into long coverage segment will occur at distances of 2x the mounting height up to 15 ft (4.57 m) and 1.75x up to 20 ft (6.10 m). Lens assembly rotates 15° to enable adjustment in order to line up long segments.
