Lighting for People®

Bruno Tunable White

Inspired by Mies van der Rohe, Bruno suspended and wall luminaires follow the minimalist master's philosophy of Less is More. Less adornment. More advancement. Less excess. More excellence. Now available in Tunable White. Bruno delivers stellar performance and quality illumination from a low-profile form. Option rich, making it well-suited for an endless amount of applications.

Mainstream Dynamic Tunable White

Mainstream Dynamic brings exciting features once reserved for niche applications into everyday lighting systems. The Tunable White feature allows designers to include white light into their scenes—matching the optimal light for different activities or to complement colors or materials within a visual environment. When Tunable White is deployed on our nLight controls network, we call it nTune. This allows nLight to control lighting color temperature on the same network that manages motion detection, daylight harvesting and dimming. Customers can build a system of controls and luminaires that work seamlessly together.

nLight natively supports Tunable White through nTune luminaires

- Simple plug & play installation by utilizing the nLight network and all nLight devices that are available today
- Adjust to any CCT in the Productivity Range 3000K-5000K or Rhythm Range 2700K-6500K
- Customize your application with SensorView™
- Available WallPod Options for custom button naming and out-of-box tunable white control
