

EPANL™

Highly Configurable LED Flat Panel

Options Amplified. Applications Maximized.

The EPANL LED flat panel by Lithonia Lighting® is a highly configurable fixture manufactured in North America to minimize lead times. EPANL boasts high quality materials, including a PMMA acrylic light guide plate and longlife LEDs to provide a solution that stands the test of time. Embedding Sensor Switch JOT single room lighting controls or nLight® wired or wireless networked lighting controls broadens your EPANL options and makes it easy to customize your lighting for the space or task at hand. EPANL is the perfect choice for schools, offices, healthcare facilities and other commercial spaces.

Features:

Over 137,000 configurations

Over 100 DLC Premium qualified listings

Multiple mounting options: recessed, suspended and surface box*

Sensor Switch wireless, app-free solution for single room lighting controls

Factory installed emergency battery packs*

nLight wired or wireless lighting controls with embedded sensors available
