

# SBOR Pole Mount Sensor

## Passes 500,000 Cycles

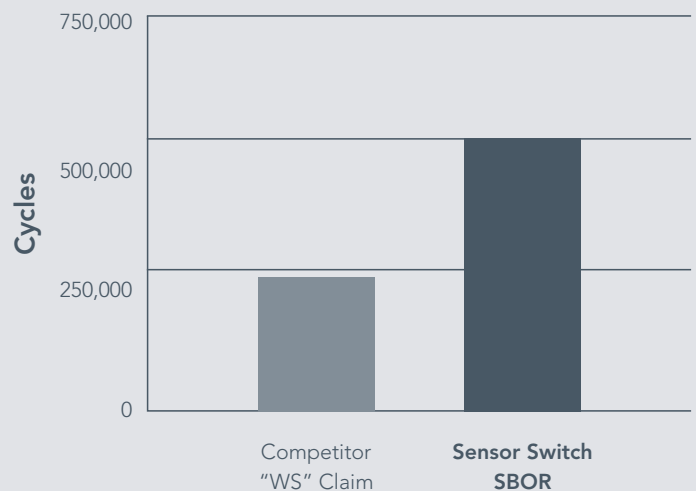

The Sensor Switch SBOR outdoor rated pole mount sensor utilizes 100% Digital Passive Infrared (PIR) technology that is tuned for walking size motion while preventing false tripping from the environment. This line voltage motion sensor is designed to mount conveniently through a 1/2" knockout (7/8" hole) in a lighting fixture or pole.

### Performance You Can Count On

After 500,000 relay cycles at load capacity, the SBOR pole mount sensor surpassed the competitive cycle testing reliability claim by more than two times. All SBOR test samples were still functioning normally.

Sensor Switch SBOR was subjected to electronic ballast load cycle testing in accordance to UL 916 Clause 51 through an independent UL certified test lab.
