

UFIT™ and UFITR™ Application Guide

UFIT and UFITR Product Highlights

- Available in 46-inch, 48-inch, 92-inch and 96-inch length options.
- High lumen output available; up to 10,000 lumens in a 48-inch and 20,000 lumens in a 96-inch fixture.
- Standard and high-efficiency options—up to 150 LPW
- Truly industrial temperature ratings; high ambient option for 50°C
- 120V, 277V, 347V or 480V voltage ratings suited for many environments
- 10% Dimming driver standard; 1% eidoLED driver available
- Dependable surge protection with 2.5kV standard or an optional 6kV
- PLR options available to reduce wiring and installation time.

UFIT™ and UFITR™ Controls Guide

The UFIT and UFITR are the first low bays and industrial retrofit kits to come enabled with nLight® AIR from the factory. The nLight sensor is designed directly into the lens without changing the shape or size of the fixture, for a seamless look.

These sensors provide basic motion sensor functionality out of the box, but also allow for more detailed configuring and programming via the nLight® network.

nLight® options for UFIT and UFITR

NLTAIR2 RES7

- Integrated occupancy sensor with automatic photo dimming cell for individual fixture control
- Works out of the box as a 7.5/2.5 fixture motion sensor
- Capable of wireless configuration and programming via CLAIRITY™ Mobile App
- PDT option adds microphonic technology for low-motion areas

NLTAIR2 RIO

- Integral connection for an individual fixture to the nLight AIR Network without the sensor functions

rPP20D

- Add as an accessory to individual or rows of fixtures to connect them to the nLight Air Network
- Able to be mounted to the back of the fixture or remotely depending on mounting type

Analog Sensor Options for UFIT and UFITR

LSXR

- Add as an accessory to individual or rows of fixtures
- Provides motion and photo control functionality
- Default functionality is a 10 minute motion sensor, but additional programming possible in the field
- 0-10V control
- Available in multiple mounting heights and lens patterns
